

I DIDN'T KNOW THAT!

Boot Brushing

Did you know mud and dirt attached to our shoes can carry plant seeds?

As we hike, the seed fall off accidentally planting unwanted species along the trail.

If they are invasive plant seeds, they cause a serious problem.

Invasive plants become competition with native plants and can even threaten extinction.

You can help stop the spread of invasive species!

By following these tips:

1

Always practice Leave No Trace principles

2

Brush your boots before a hike to remove dirt & seeds

3

Tell a friend and pass it on!
