

Hot!

The thermal areas of the park have hot springs, mud pots and fumaroles that are interesting geologic features.

Coming into contact with any one of these thermal wonders would cause serious physical harm.

Observe safety signs and keep on marked trails when visiting thermal areas.

Camping

Never swim alone.
Do not dive into unknown waters.

Build fires in existing fire circles.
Do not let children play near campfires.

Hike only on marked trails.
Do not let children wander from campsites, picnic area or parked car.

When camping in the backcountry:

Make your camp at least 100 feet from your water source.

Boil all water used for cooking and drinking.

BE SAFETY CONSCIOUS

Ask a Park Ranger for any Information you may need to use the park safely.

NATIONAL PARK SERVICE
U. S. DEPARTMENT OF INTERIOR

**A SAFE VISIT
IS A HAPPY VISIT TO
LASSEN VOLCANIC
NATIONAL PARK**

Animals are wild

The animals in the park are not tame. They are wild creatures that are best observed from a safe distance.

If you attempt to feed them which is illegal they may act in an unpredictable way that could make your visit a painful one.

Remember

The Chaos Crags is a geologically young and unstable area.

About 300 years ago a series of avalanches scattered the debris known as the Chaos Jumbles.

Because of relatively recent volcanic activity and avalanches, the areas to the North and East of Chaos Crags are considered as hazard zones. This zone includes the Manzanita Lake area.

It is unlikely that you will be involved in such an event but a healthy respect of this possibility is simply being safety conscious.

Caution

Lassen Volcanic National Park road is a mountainous one with steep grades and sharp curves in places.

Slow down and you will see and remember more along the road.

If you wish to stop please use only turnouts and parking areas.
