

# Grand Marais Ski Trails

National Park Service  
U.S. Department of the Interior

Pictured Rocks National Lakeshore

Park ski trails are located in Munising and Grand Marais. Trails wind through a magical landscape in a variety of habitats and topography. Beech, maple, hemlock, and conifer forests, and old fields grow on the sandy uplands and rugged hills of old glacial features. The trails receive over 150 inches of snow each winter.

Each trail offers a variety of loop lengths for a leisurely day ski or quick workout at the end of the day. All park trails are designed for diagonal stride only - skating is not permitted.

Trail junctions are marked with green posts and maps are available at most intersections. Trails are groomed regularly - watch and listen for grooming equipment when you ski.

Whether you are a novice or an accomplished skier, we hope you find the trails challenging and fun.

## For Your Safety

- Ski with a partner. Or let someone know where you are going and when you expect to return.
- Dress in layers and anticipate changes in the weather.
- Storms are common in the area and may rise quickly leading to white-out conditions and heavy snow fall. Wind may obliterate the trails.
- Heavy weekend use and alternating daytime thawing and nighttime freezing may turn snow packed slopes into fast, icy runs.
- Watch and listen for grooming equipment.
- Be alert at road crossings to trails D and between B & C.
- Darkness comes early in winter so allow plenty of time to return to your vehicle before dark.
- To avoid ruining groomed tracks, snowshoeing, walking, and skating are not permitted on the ski trails.
- Pets, snowshoes, fires, camping, bicycles, and drones are prohibited.

**Watch for snowmobiles and vehicles at road crossings!**

**For Emergency - Dial 911**
