

DISCOVER Birds

©JACK RIGBY

Go to any trail.

Try it!

Cup your hands behind your ears. Listen quietly. Imitate the bird sounds you hear. Make up your own bird song.

Search for bird clues such as feathers, nests, egg shells, and woodpecker holes.

Use a magic word to turn into hungry birds searching for different foods. First—seeds. Second—insects. Third—nectar from flowers.

Count how many colors you can find on birds.
