

DISCOVER Insects

©JIM SCHMIDT

**Go to any forest
or meadow.**

Try it!

Roll over logs and rocks. Who is crawling below? Put everything back as it was.

Search for signs of hungry insects chewing leaves, sipping nectar from flowers, or tunneling under bark.

Pretend to be a butterfly going through its life cycle: egg, caterpillar, cocoon, and adult.

Use a magic word to turn into insects that move in different ways. First—hop. Second—fly. Third—crawl.
