

FRIENDS *of the*
APOSTLE ISLANDS NATIONAL LAKESHORE

WAVE WATCH is a series of buoys strategically placed in the waters of the Apostle Islands giving boaters **FREE**

real-time, site specific wave and wind information refreshed every 30 minutes, twenty-four hours a day. Access **WAVE WATCH** using the QR code or visit our website at: friendsoftheapostleislands.org

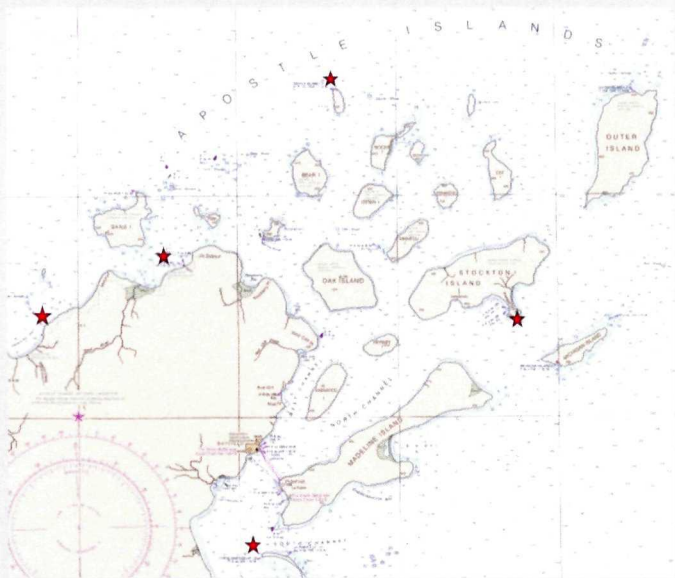

Kayakers

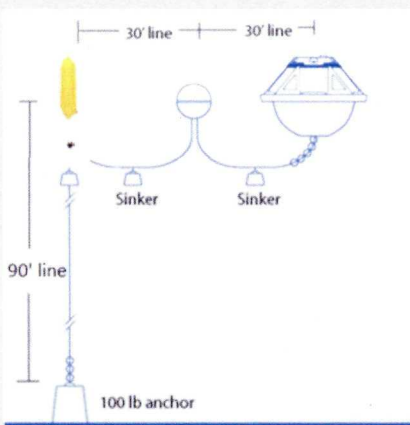

Sailors

Boaters

Wave Watch is a partnership between **Friends of the Apostle Islands**, the **National Park Service**, and the **University of Wisconsin** to give boaters the information they need when they need it. Each buoy streams wave height, wave direction, even water temperature right to a boater's fingertips.

The yellow wave buoys have a flashing amber light with a 2 second interval at approximately 1 ft. above the waterline. The flag is 3 ft. above the waterline.
