CATEGORY DEFINITIONS

Abundance

Abundant	May be seen daily, in suitable habitat and season, and counted in relatively large numbers.
Common	May be seen daily, in suitable habitat and season, but not in large numbers.
Uncommon	Likely to be seen monthly in appropriate season/habitat. May be locally common.
Rare	Present, but usually seen only a few times each year.
Occasional	Occurs in the park at least once every few years, but not necessarily every year.
Unknown	Abundance is unknown.

Residency

Breeder	Population reproduces in the park.
Resident	A significant population is maintained in the park for more than two months each year, but it is not known to breed there.
Migratory	Migratory species that occurs in park approximately two months or less each year and does not breed there.
Vagrant	Park is outside of the species usual range.
Unknown	Residency status in park is unknown.

CATEGORY DEFINITIONS

Abundance

Abundant	May be seen daily, in suitable habitat and season, and counted in relatively large numbers.
Common	May be seen daily, in suitable habitat and season, but not in large numbers.
Uncommon	Likely to be seen monthly in appropriate season/habitat. May be locally common.
Rare	Present, but usually seen only a few times each year.
Occasional	Occurs in the park at least once every few years, but not necessarily every year.
Unknown	Abundance is unknown.

Residency

Breeder	Population reproduces in the park.
Resident	A significant population is maintained in the park for more than two months each year, but it is not known to breed there.
Migratory	Migratory species that occurs in park approximately two months or less each year and does not breed there.
Vagrant	Park is outside of the species usual range.
Unknown	Residency status in park is unknown.
