

DISCOVER Trees

©JIM SCHMIDT

Go to a trail through
the forest.

Try it!

Different animals use different layers of the forest. Look for their clues high and low.

Hunt for assorted leaves and nuts. Compare shapes, colors, and textures.

Hide an interesting nut in your pocket or bag. Have the other person feel inside without looking, and then search for a matching nut.

Use your bodies to measure trees, sticks, nuts, and logs. What is biggest? Smallest?
