

# Giant Ice Cave

NPS Photo

## Caving Difficulty – Moderate

Giant Ice Cave is a bouldering experience near delicate natural resources such as ice formations. Care should be taken to avoid damaging ice. Bring a helmet, gloves, kneepads, sturdy shoes, and three sources of light. Practice cave safety and only go as far as you feel comfortable. **A caving permit is required for entry.**

## White-Nose Syndrome

White-nose syndrome (WNS) is a disease that afflicts hibernating bats. It is spreading rapidly and can kill between 90-100 percent of the bats it affects. By following proper decontamination procedures, and not using any gear that has been inside a WNS cave, you help to reduce and slow the spread of WNS. When getting your cave permit, review the following steps with a ranger:

**Check:** Has any of your gear been inside any other cave?

**Clean:** Remove all debris from gear.

**Decontaminate:** Any gear that has been in a cave outside of El Malpais needs to be decontaminated. You will also need to walk through a shoe decontamination station, located at the trail head, both before and after your caving experience.

Ask a ranger or call (505) 876-2783 for more details.

## Directions

From Highway 53, take Cibola County Road 42 south to NPS Road 300 and follow the road to the Big Tubes parking area. High clearance vehicles are recommended.

Hike the cairn trail across the lava bridge in front of Big Skylight's entrance and turn left (north) on the east side of the trench. Follow a set of small cairns along the trench and look for a place to climb down after 150 feet.

## Cave Map

## Caution

Caving and hiking in remote areas are inherently dangerous. Loose footing, difficult terrain, disorientation, extreme heat and cold, and falls are common risks. Cave ceilings can be low and cause serious head injury. See a park ranger for a caving permit and more information.
