

Appendix 13

The following list is taken from the initial frames of Roll 1, the first of seven rolls of microfilm of the Kohrs-Bielenberg-Warren Papers photographed in the fall of 1975 by University of Montana Archivist Dale Johnson under contract to the National Park Service. It is provided for planning purposes by those utilizing this report prior to further Grant-Kohrs Ranch research.

The Conrad Kohrs Papers contain the correspondence and financial records of Conrad Kohrs and the Kohrs and Bielenberg partnership, and the records of various companies that Kohrs controlled. Kohrs and his half brother John Bielenberg operated the ranch and many of their other joint investments as a partnership until 1908, when they incorporated as the Kohrs and Bielenberg Land and Livestock Company. All unidentifiable records were filmed with the Conrad Kohrs segment of the collection. In researching into the various activities of Kohrs, one may be able to identify some of these records as belonging to one of the several subgroups.

The legibility of some of the records, in particular of the letterpress copybooks, is generally poor. This is due in part to water damage that occurred when the image was transferred from the original to the tissue lettercopy. It is due also to deterioration over the many years of storage. In most cases the original document is as illegible as the microfilm copy.
