The Water's THE DIFFERENCE!

Many health clubs around the country have come into the health business during the past few years, but Hot Springs was founded on this very idea.

From the time Indians bathed, soaked, and played in the springs Thermal Water until present day, Hot Springs' only reason for having formed as a town was the health of the nation...yes, the world.

Hot water baths, even hotter than the Bath Houses are permitted to bathe patrons in, are given in various health clubs, clinics, and spas around the country, but there is only one Hot Springs Thermal Water.

Naturally Hot without man's heating, Naturally Pure without man's purifying. And most of all, with the very minute amount of radioactive gas emanating from the water while it is cool enough to bathe in.

Yes, truly — The Water's THE DIFFERENCE at Hot Springs.

Health Services, Inc., is Hot Springs' AFTER HOUR BATH HOUSE. Our only bathing hours are those listed in this brochure. Designed for the late arrival of visitors to Hot Springs who get to their hotel or motel after the regular hour bath houses have closed for the day and for local residents who cannot, because of the press of business or other commitments, bathe during the working day. Open weekends and holidays as well, Health Services, Inc., caters to first timers as well as veteran bathers who have been coming to Hot Springs for years

and desire to get that "one more bath" before leaving Hot Springs.

Following a hard day's driving, golfing, fishing, hiking, or the day to day pressure of the work-a-day business world, a Thermal Bath and Massage at Health Services, Inc., can help put you back in better condition to take on the lake, golf course, or the world tomorrow.

Health Services, Inc. is a united effort of the Bath Houses of Hot Springs to give the bathing public a greater variety of bathing hours. Located in the center of Bath House Row, we are under regulation of the National Park Service, as are all Bath Houses utilizing the Thermal Water of Hot Springs.

The Thermal Baths may be taken without a doctor's direction. However, bathers are advised by the National Park Services that greater benefits may be derived when taken under a registered physician's direction.

The Standard Bath includes an old-fashioned tub bath, Vapor cabinet, sitz bath, and hot packs to sore or irritated joints or muscles followed by a warm shower and cooling room facilities. All linens are furnished, sheets to be used in lieu of a robe, and of course, towels for drying and packs.

A more relaxing time you have never spent than the time of bathing in a Whirlpool Tub of Hot Springs Thermal Water.

How about a complete body massage to top off the bathing period — like icing on the cake! Come into Health Services, Inc.
