Franklin, perhaps the most famous American during the 1700's, was a printer, inventor, scientist, politician, and writer. Some of his inventions, such as bifocal glasses and the lightning rod, are still used today. He was a key figure in the creation of the U.S., helping to write the Declaration of Independence and the U.S. Constitution.

*"If you wou'd not be forgotten  
As soon as you are dead and rotten,  
Either write things worth reading,  
or do things worth the writing."*
