National Park Service, U.S. Department of the Interior

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering sound use of our land and water resources, protecting our fish, wildlife, and biological diversity, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department

assesses our energy and mineral resources and works to ensure that their development is in the best interest of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

Introduction

Grand Canyon National Park

National Park System

Lincoln Memorial

On August 25, 1916, President Woodrow Wilson signed the act creating the National Park Service, a new federal bureau in the Department of the Interior responsible for protecting the 40 national parks and monuments then in existence and those yet to be established. This "Organic Act" of August 25, 1916, states that "the Service thus established shall promote and regulate the use of Federal areas known as national parks, monuments and reservations . . . by such means and measures as conform to the fundamental purpose of the said parks, monuments and reservations, which purpose is to conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations."

The National Park Service still strives to meet those original goals, while filling many other roles as well: guardian of our diverse cultural and recreational resources; environmental advocate; world leader in the parks and preservation community; and pioneer in the drive to protect America's open space.

The National Park System of the United States comprises 368 areas covering more than 83 million acres in 49 States, the District of Columbia, American Samoa, Guam, Puerto Rico, Saipan, and the Virgin Islands. These areas are of such national significance as to justify special recognition and protection in accordance with various acts of Congress.

By Act of March 1, 1872, Congress established Yellowstone National Park in the Territories of Montana and Wyoming "as a public park or pleasuring ground for the benefit and enjoyment of the people" and placed it "under exclusive control of the Secretary of the Interior." The founding of Yellowstone National Park began a worldwide national park movement. Today more than 100 nations contain some 1,200 national parks or equivalent preserves.

In the years following the establishment of Yellowstone, the United States authorized additional national parks and monuments, most of them carved from the federal lands of the West. These, also, were administered by the Department of the Interior, while other monuments and natural and historical areas were administered as separate units by the War Department and the Forest Service of

the Department of Agriculture. No single agency provided unified management of the varied federal parklands.

An Executive Order in 1933 transferred 63 national monuments and military sites from the Forest Service and the War Department to the National Park Service. This action was a major step in the development of today's truly national system of parks—a system that includes areas of historical as well as scenic and scientific importance.

Congress declared in the General Authorities Act of 1970 "that the National Park System, which began with the establishment of Yellowstone National Park in 1872, has since grown to include superlative natural, historic, and recreation areas in every region . . . and that it is the purpose of this Act to include all such areas in the System. . . ."

Additions to the National Park System are now generally made through acts of Congress, and national parks can be created only through such acts. But the President has authority, under the Antiquities Act of 1906, to proclaim national monuments on lands already under federal jurisdiction. The Secretary of the Interior is usually asked by Congress for recommendations on proposed additions to the System. The Secretary is counseled by the National Park System Advisory Board, composed of private citizens, which advises on possible additions to the System and policies for its management.

Nomenclature of Park System Areas

The diversity of the parks is reflected in the variety of titles given to them. These include such designations as national park, national preserve, national monument, national memorial, national historic site, national seashore, and national battlefield park:

Although some titles are self-explanatory, others have been used in many different ways. For example, the title "national monument" has been given to great natural reservations, historic military fortifications, prehistoric ruins, fossil sites, and to the Statue of Liberty.

In recent years, Congress and the National Park Service have attempted, with some success, to simplify the nomenclature and to establish basic criteria for use of the different official titles. Brief definitions of the most common titles follow.

Areas added to the National Park System

for their natural values are expanses or features of land or water of great scenic and scientific quality and are usually designated as national parks, monuments, preserves, seashores, lakeshores, or riverways. Such areas contain one or more distinctive attributes such as forest, grassland, tundra, desert, estuary, or river systems; they may contain "windows" on the past for a view of geological history, imposing landforms such as mountains, mesas, thermal areas, and caverns, and they may be habitats of abundant or rare wildlife and plantlife.

Generally, a **national park** contains a variety of resources and encompasses large land or water areas to help provide adequate protection of the resources.

A **national monument** is intended to preserve at least one nationally significant resource. It is usually smaller than a national park and lacks its diversity of attractions.

In 1974, Big Cypress and Big Thicket were authorized as the first **national preserves**. This category is established primarily for the protection of certain resources. Activities such as hunting and fishing or the extraction of minerals and fuels may be permitted if they do not jeopardize the natural values. **National reserves** are similar to the preserves. Management, may be transferred to local or state authorities. The first reserve, City of Rocks, was established in 1988.

Preserving shoreline areas and off-shore islands, the **national lakeshores** and **national seashores** focus on the preservation of natural values while at the same time providing water-oriented recreation. Although national lakeshores can be established on any natural freshwater lake, the existing four are all located on the Great Lakes. The national seashores are on the Atlantic, Gulf, and Pacific coasts.

National rivers and **wild and scenic riverways** preserve ribbons of land bordering on free-flowing streams which have not been dammed, channelized, or otherwise altered. Besides preserving rivers in their natural state, these areas provide opportunities for outdoor activities such as hiking, canoeing, and hunting.

National scenic trails are generally long-distance footpaths winding through areas of natural beauty.

Although best known for its great scenic parks, more than half the areas of the Na-

tional Park System preserve places and commemorate persons, events, and activities important in the Nation's history. These range from archeological sites associated with prehistoric Indian civilizations to sites related to the lives of modern Americans. Historical areas are customarily preserved or restored to reflect their appearance during the period of their greatest historical significance.

In recent years, **national historic site** has been the title most commonly applied by Congress in authorizing the addition of such areas to the National Park System. A wide variety of titles—**national military park**, **national battlefield park**, **national battlefield site**, and **national battlefield**—has been used for areas associated with American military history. But other areas such as **national monuments** and **national historical parks** may include features associated with military history. **National historical parks** are commonly areas of greater physical extent and complexity than national historic sites. The lone **international historic site** refers to a site relevant to both U.S. and Canadian history.

The title **national memorial** is most often used for areas that are primarily commemorative. But they need not be sites or structures historically associated with their subjects. For example, the home of Abraham Lincoln in Springfield, Ill., is a national historic site, but the Lincoln Memorial in the District of Columbia is a national memorial.

Several areas administered by National Capital Region whose titles do not include the words national memorial are nevertheless classified as memorials. These are Lincoln Memorial, Lyndon Baines Johnson Memorial Grove on the Potomac, Theodore Roosevelt Island, Thomas Jefferson Memorial, and the Washington Monument—all in the District of Columbia.

Originally, **national recreation areas** in the Park System were units surrounding reservoirs impounded by dams built by other federal agencies. The National Park Service manages many of these areas under cooperative agreements. The concept of recreational areas has grown to encompass other lands and waters set aside for recreational use by acts of Congress and now includes major areas in urban centers. There are also national recreation areas outside the National Park System that are administered by the Forest Service,

U.S. Department of Agriculture.

National parkways encompass ribbons of land flanking roadways and offer an opportunity for leisurely driving through areas of scenic interest. They are not designed for high speed travel. Besides the areas set aside as parkways, other units of the National Park System include parkways within their boundaries.

One area of the National Park System has been set aside primarily as a site for the **performing arts**. This is Wolf Trap Farm Park for the Performing Arts, Virginia, America's first such national park. Two historical areas, Ford's Theatre National Historic Site, in Washington, D.C., and Chamizal National Memorial, Texas, also provide facilities for the performing arts.

Designation of Wilderness Areas

In the Wilderness Act of 1964, Congress directed three federal agencies, including the National Park Service, to study certain lands within their jurisdiction to determine the suitability of these lands for inclusion in the National Wilderness Preservation System.

By subsequent legislation, Congress has designated **wilderness areas** in many units of the National Park System. This designation (noted in this booklet in the listing by states) does not remove wilderness lands from the parks, but it does ensure that they will be managed to retain their "primeval character and influence, without permanent improvements or human habitation."

The Act provides, generally, that "there shall be no commercial enterprise and no permanent road within any wilderness area . . . and (except for emergency uses) no temporary road, no use of motor vehicles, motorized equipment or motorboats, no landing of aircraft, no other form of mechanical transport, and no structure or installation." Wilderness areas are open to hiking and, in some cases, horseback riding, primitive camping, and similar pursuits.

Parks in the Nation's Capital

Washington, D.C., has a unique park system. Most public parks are administered by the Federal Government through the National Capital Area of the National Park Service.

National Capital Area has inherited duties originally assigned to three Federal Commissioners appointed by President George Wash-

ington in 1790. The city's parks were administered by a variety of federal agencies until this responsibility was assigned to the National Park Service under the Reorganization Act of 1933. Most parklands in the city are included in the federal holdings, although the District of Columbia also operates parks, playgrounds, and recreational facilities. National Capital Area also administers several National Park System units in Maryland, Virginia, and West Virginia.

Related Areas

Besides the National Park System three groups of areas exist—Affiliated Areas, the Wild and Scenic Rivers System, and the National Trails System—that are closely linked in importance and purpose to those areas managed by the National Park Service. These areas are not units of the National Park System, yet they preserve important segments of the Nation's heritage. They are listed in Part 3 of this book.

Descriptive Listing of National Park System Areas by State

Wright Brothers National Memorial

Alabama

Horseshoe Bend

National Military Park

11238 Horseshoe Bend Road
Daviston, AL 36256
205-234-7111

On March 27, 1814, at the "horseshoe bend" in the Tallapoosa River, Gen. Andrew Jackson's forces broke the power of the Upper Creek Indian Confederacy and opened large parts of Alabama and Georgia to settlement.

Authorized July 25, 1956.

Acreage—2,040, all federal.

Little River Canyon

National Preserve

P.O. Box 45
2201-E Gault Ave. North
Fort Payne, AL 35967
205-997-9239

The preserve protects the natural, scenic, recreational, and cultural resources of the Little River Canyon of northeast Alabama. Little River flows atop Lookout Mountain for most of its length. Erosion has created a variety of superlative rock expanses, benches, and bluffs that create a unique environment for several threatened and endangered species and for recreational pursuits including kayaking and rock climbing. Hunting, fishing, and trapping are permitted. NO FEDERAL FACILITIES.

Authorized Oct. 24, 1992.

Acreage—13,699, all nonfederal.

Natchez Trace

National Scenic Trail

(See Mississippi)

Natchez Trace Parkway

(See Mississippi)

Russell Cave

National Monument

3729 County Road 98
Bridgeport, AL 35740
205-495-2672

An almost continuous archeological record of human habitation from at least 7000 BC to about AD 1650—Transitional Paleo to Mississippian cultural periods—is revealed in this cave. Proclaimed May 11, 1961.

Acreage—310.45, all federal.

Tuskegee Institute

National Historic Site

P.O. Drawer 10
Tuskegee Institute, AL
36087
205-727-3200

Booker T. Washington founded this college for African Americans in 1881. Preserved here are the brick buildings the students constructed themselves, Washington's home, and the George Washington Carver Museum, which serves as the visitor center. The college is still an active institution that owns most of the property within the national historic site.

Authorized Oct. 26, 1974.

Acreage—57.62 Federal: 8.32 Nonfederal: 49.30.

Alaska

Seven national park areas in Alaska have adjoining national preserves that are counted as separate units of the National Park System but managed jointly. They are: Aniakchak, Denali, Gates of the Arctic, Glacier Bay, Katmai, Lake Clark, and Wrangell-St. Elias. In this book these seven areas are listed as one entry each.

Alagnak Wild River

c/o Katmai National Park
and Preserve, P.O. Box 7
King Salmon, AK 99613
907-246-3305

The Alagnak River flows from Kukaklek Lake in Katmai National Preserve and offers 69 miles of outstanding white-water floating. The river is also noted for abundant wildlife and sport fishing for five species of salmon. Portions of the main stem lie outside and westward of Katmai.

Established Dec. 2, 1980. Length: 69 miles.

Acreage—30,745.25 Federal: 26.351 Nonfederal: 4,394.25.

Aniakchak National Monument and Preserve
P.O. Box 7
King Salmon, AK 99613
907-246-3305

The Aniakchak Caldera, covering some 30 square miles, is one of the great dry calderas in the world. Located in the volcanically active Aleutian Mountains, the Aniakchak last erupted in 1931. The crater includes lava flows, cinder cones, and explosion pits, as well as Surprise Lake, source of the Aniakchak River, which cascades through a 1,500-foot gash in the crater wall. The site contains the Aniakchak Wild River. NO FEDERAL FACILITIES.

Proclaimed as Aniakchak National Monument Dec. 1, 1978; established as a national monument and preserve Dec. 2, 1980.

Acreage—National monument: 137,176, all federal. National Preserve: 465,603 Federal: 434,933 Nonfederal: 30,670.

Bering Land Bridge National Preserve
P.O. Box 220, Nome, AK 99762
907-443-2522

Located on the Seward Peninsula in northwest Alaska, the preserve is a remnant of the land bridge that once connected Asia with North America more than 13,000 years ago. Paleontological and archeological resources abound; large populations of migratory birds nest here. Ash explosion craters and lava flows, rare in the Arctic, are also present. LIMITED FEDERAL FACILITIES.

Proclaimed as Bering Land Bridge National Monument Dec. 1, 1978; established as a national preserve Dec. 2, 1980.

Acreage—2,784,960 Federal: 2,690,179 Nonfederal: 94,781.

Cape Krusenstern National Monument
P.O. Box 1029
Kotzebue, AK 99752
907-442-3890

Archeological sites located along a succession of 114 lateral beach ridges illustrate Eskimo communities of every known cultural period in Alaska, dating back some 4,000 years. Older sites are located inland, along the foothills. The monument includes a representative example of the arctic coastline along the Chukchi Sea. LIMITED FEDERAL FACILITIES.

Proclaimed Dec. 1, 1978. Boundary change: Dec. 2, 1980.

Acreage—649,711.88 Federal: 444,673 Nonfederal: 205,038.88.

Denali National Park and Preserve
P.O. Box 9
McKinley Park, AK 99755
907-683-2294

The park contains North America's highest mountain, 20,320-foot Mount McKinley. Large glaciers of the Alaska Range, caribou, Dall sheep, moose, grizzly bears, and timber wolves are other highlights of this national park and preserve.

Established as Mt. McKinley National Park Feb. 26, 1917. Separate Denali National Monument proclaimed Dec. 1, 1978. Both incorporated into and established as Denali National Park and Preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Other boundary changes: Jan. 30, 1922; March 19, 1932. Designated a Biosphere Reserve 1976.

Acreage—National park: 4,741,910 Federal: 4,724,505.36 Nonfederal: 17,404.64. National preserve: 1,334,618 Federal: 1,304,132 Nonfederal: 30,486. Wilderness area: 1,900,000.

**Gates of the Arctic
National Park and Preserve**
P.O. Box 74680
Fairbanks, AK 99707
907-456-0281

Lying entirely north of the Arctic Circle, the park and preserve includes a portion of the Central Brooks Range, the northernmost extension of the Rocky Mountains. Often referred to as the greatest remaining wilderness in North America, this second largest unit of the National Park System is characterized by jagged peaks, gentle arctic valleys, wild rivers, and numerous lakes. The forested southern slopes contrast to the barren northern reaches of the site at the edge of Alaska's "north slope." The park-preserve contains the Alatna, John, Kobuk, part of the Noatak, the North Fork of the Koyukuk, and the Tinayguk Wild Rivers. And with adjacent Kobuk Valley National Park and Noatak National Preserve, it is one of the largest park areas in the world.

LIMITED FEDERAL FACILITIES.
Proclaimed Gates of the Arctic National Monument Dec. 1, 1978; established as a national park and preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Designated a Biosphere Reserve (portion) 1984.

*Acreege—National park: 7,523,888 Federal: 7,074,831.50
Nonfederal: 449,056.50. National preserve: 948,629 Federal:

**Glacier Bay
National Park and Preserve**
P.O. Box 140
Gustavus, AK 99826
907-697-2232

Great tidewater glaciers, a dramatic range of plant communities from rocky terrain recently covered by ice to lush temperate rain forest, and a large variety of animals, including grizzly bear, mountain goats, whales, seals, and eagles can be found within the park. Also included are Mount Fairweather, the highest peak in southeast Alaska, and the U.S. portion of the Alsek River.

Proclaimed Glacier Bay National Monument Feb. 25, 1925; established as a national park and preserve Dec. 2, 1980. Boundary changes: April 18, 1939; March 31, 1955; December 1, 1978. Wilderness designated Dec. 2, 1980. Designated a Biosphere Reserve 1986.

Nonfederal: 346. National preserve: 57,884 Federal: 55,439
Nonfederal: 2,445. Wilderness area: 2,770,000.*

**Katmai
National Park and Preserve**
P.O. Box 7
King Salmon, AK 99613
907-246-3305

Variety marks this vast land: lakes, forests, mountains, and marshlands all abound in wildlife. The Alaska brown bear, the world's largest carnivore, thrives here, feeding upon red salmon that spawn in the many lakes and streams. Wild rivers and renowned sport fishing add to the attractions of this subarctic environment. Here, in 1912, Novarupta Volcano erupted violently, forming the ash-filled "Valley of Ten Thousand Smokes" where steam rose from countless fumaroles. Today only a few active vents remain. The park-preserve contains part of the Alagnak Wild River.

Proclaimed as Katmai National Monument Sept. 24, 1918; established as a national park and preserve Dec. 2, 1980. Boundary changes: April 24, 1931; Aug. 4, 1942; Jan. 20, 1969; Dec. 1, 1978; Dec. 2, 1980. Wilderness designated Dec. 2, 1980.

*Acreege—National park: 3,674,540.87 Federal: 3,611,286
Nonfederal: 63,254.87. National preserve: 418,699.30

Kenai Fjords National Park

P.O. Box 1727
Seward, AK 99664
907-224-3175

The park includes one of the four major ice caps in the U.S., the 300-square-mile Harding Icefield, and coastal fjords. Here a rich, varied rain forest is home to tens of thousands of breeding birds, and adjoining marine waters support a multitude of sea lions, sea otters, and seals. The visitor center is in Seward, 10 miles from the park.

Proclaimed Kenai Fjords National Monument Dec. 1, 1978; established as a national park Dec. 2, 1980.

Acreeage—670,642.79 Federal: 529,273 Nonfederal: 141,369.79.

**Klondike Gold Rush
National Historical Park**

P.O. Box 517
Skagway, AK 99840
(See also Washington)
907-983-2921

Historic buildings in Skagway and portions of Chilkoot and White Pass Trails, all prominent in the 1898 gold rush, are included in the park. A visitor center is located in the Pioneer Square Historic District in Seattle, Wash.
Established June 30, 1976.

Acreeage—13,191.35 Federal: 2,418.93 Nonfederal: 10,772.42.

Kobuk Valley National Park

P.O. Box 1029
Kotzebue, AK 99752
907-442-3890

Embracing the central valley of the Kobuk River, the park, located entirely north of the Arctic Circle, includes a blend of biological, geological, and cultural resources. Here, in the northmost extent of the boreal forest, a rich array of arctic wildlife can be found, including caribou, grizzly and black bear, wolf, and fox. The 25-square-mile Great Kobuk Sand Dunes lie just south of the Kobuk River against the base of the Waring Mountains. Archeological sites revealing more than 10,000 years of human occupation are among the most significant sites known in the Arctic. The park contains the Salmon Wild River. LIMITED FEDERAL FACILITIES.

Proclaimed Kobuk Valley National Monument Dec. 1, 1978; established as a national park Dec. 2, 1980. Wilderness designated Dec. 2, 1980.

Acreeage—1,750,736.86 Federal: 1,669,643 Nonfederal: 81,093.86. Wilderness area: 190,000.

**Lake Clark
National Park and Preserve**

4230 University Drive
Suite 311
Anchorage, AK 99508
907-781-2218

Located in the heart of the Chigmit mountains along the western shore of Cook Inlet, the park-preserve contains great geologic diversity, including jagged peaks, granite spires, and two symmetrical active volcanoes. More than a score of glacially carved lakes rim the mountain mass. Lake Clark, more than 40 miles long, is not only the largest lake here, but it is also the headwaters for red salmon spawning. Merrill and Lake Clark Passes cut through the mountains and are lined by dozens of glaciers and hundreds of waterfalls that cascade over rocky ledges. The park-preserve contains the Chilikadrotna, Mulchatna, and Tlikakila Wild Rivers. LIMITED FEDERAL FACILITIES.

Proclaimed Lake Clark National Monument Dec. 1, 1978; established as a national park and preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980.

Acreeage—National park: 2,636,839 Federal: 2,573,724.02 Nonfederal: 63,114.98. National preserve: 1,407,293 Federal: 1,297,503.16 Nonfederal: 109,789.84. Wilderness area: 2,470,000.

Noatak National Preserve

P. O. Box 1029
Kotzebue, AK 99752
907-442-3890

The Noatak River basin is the largest mountain-ringed river basin in the Nation still virtually unaffected. The preserve includes landforms of great scientific interest, including the 65-mile-long Grand Canyon of the Noatak, a transition zone and migration route for plants and animals between subarctic and arctic environments, and an array of flora among the most diverse anywhere in the earth's northern latitudes. The preserve contains part of the Noatak Wild River. LIMITED FEDERAL FACILITIES.

Proclaimed as Noatak National Monument Dec. 1, 1978; established as a national preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Designated a Biosphere Reserve 1976.

Acreeage—6,569,904.04 Federal: 6,275,935 Nonfederal: 293,969.04. Wilderness area: 5,800,000.

Sitka

National Historical Park

P.O. Box 738

Yukon-Charley Rivers

National Preserve

P.O. Box 167
Eagle, AK 99738
907-547-2234

Located along the Canadian border in central Alaska, the preserve protects 115 miles of the 1,800-mile Yukon River and the entire Charley River basin. Numerous old cabins and relics are reminders of the importance of the Yukon River during the 1898 gold rush. Paleontological and archeological sites here add much to our knowledge of the environment thousands of years ago. Peregrine falcons nest in the high bluffs overlooking the river, while the rolling hills that make up the preserve are home to an abundant array of wildlife. The Charley, an 88-mile wild river, is considered by many to

be the most spectacular river in Alaska. LIMITED FEDERAL FACILITIES.

Proclaimed Yukon-Charley National Monument Dec. 1, 1978; established as a national preserve Dec. 2, 1980.

The park system of the Nation's Capital comprises parks, parkways, and reservations in the District of Columbia, including such properties as the Battleground National Cemetery, the President's Parks (Lafayette Park north of the White House and the Ellipse south of the White House), a variety of military fortifications, and green areas. When Congress established a permanent National Capital in 1790, the city's Federal Commissioners were given the power "to purchase or accept such quantity of land as the President shall deem proper for the use of the United States." Under this authority the Commissioners purchased Washington's first 17 public reservations and accepted donations of other lands required for the street system of L'Enfant's plan. Today more than 300 park units derive from these lands. Office of Public Buildings and Public Parks of the National Capital was abolished, and public reservations were transferred to National Capital Parks, National Park Service, Aug. 10, 1933. *Acreage—6,544.72 Federal: 6,480.58 Nonfederal: 64.14.*

**Missouri
National Recreational River**
P.O. Box 591
O'Neill, NE 68763-0591
402-336-3970

Two stretches of the Missouri River are protected here. The portion originally set aside, from Gavins Point Dam near Yankton, S.D., to Ponca, Neb., still exhibits the river's dynamic character in its islands, bars, chutes, and snags; it was authorized in 1978. The U.S. Army Corps of Engineers, Omaha District, manages the river through a cooperative agreement with the National Park Service. The second portion includes the land located adjacent to the free-flowing segment between Lewis and Clark Lake and Lake Francis Case. This section was authorized in 1991 and represents one of the best natural landscapes associated with the river along its entire course. Native floodplain forest, tallgrass and mixed grass prairies, and the river provide habitats for several endangered species. Recreational activities include fishing, hunting, and boating. The park also includes the lower 20 miles of the Niobrara River and 8 miles of Verdigre Creek. Authorized Nov. 10, 1978, with additional legislative action May 24, 1991. Length: 59 miles (original segment); 67 miles (1991 addition).

Acreage—undetermined.

Affiliated Areas

In an Act of August 18, 1970, the National Park System was defined in law as "any area of land and water now or hereafter administered by the Secretary of the Interior through the National Park Service for park, monument, historic, parkway, recreational or other purposes." The same law specifically excludes "miscellaneous areas administered in connection therewith," that is, those properties that are neither federally owned nor directly administered by the National Park Service but which utilize NPS assistance.

The Affiliated Areas comprise a variety of locations in the United States and Canada that preserve significant properties outside the National Park System. Some of these have been recognized by Acts of Congress, others have been designated national historic sites by the Secretary of the Interior under authority of the Historic Sites Act of 1935. All draw on technical or financial aid from the National Park Service.

Wild and Scenic Rivers System

Public Law 90-542, of October 2, 1968, provides for the establishment of a system of rivers to be preserved as free-flowing streams accessible for public use and enjoyment. Components of the system, which may include only a portion of a river, are classified as wild, scenic, or recreational rivers. They are classified according to the degree of development on the river, shoreline, and adjacent lands. Thus a wild river shows little evidence of human activity, the river is free of dams, and it is generally inaccessible except by trail. A scenic river is one with relatively primitive shorelines but accessible in places by road. A recreational river has more development, is accessible, and may have been dammed or diverted in the past.

Once a river is designated a component of the Wild and Scenic Rivers System, the objective of the managing agency is to preserve or enhance the features that qualified the river for inclusion within the system; any recreational use must be compatible with preservation. Rivers administered by the National Park Service are units of the National Park System. Those administered by the U.S. Fish and Wildlife Service are components of the National Wildlife Refuge System.

Rivers and streams that are in state-protected systems may become units of the National System if the state's Governor asks for such inclusion. The Secretary of the Interior may then designate the river, if it is appropriate, as a unit of the system. Federally managed components of the system are designated by Acts of Congress. Usually Congress first authorizes a detailed study to determine the qualification of a river area for the system.

Acreages of the wild rivers entirely within larger units of the National Park System are not given separately. Acreages of wild rivers within the National Wildlife Refuge System in Alaska and several others are undetermined.

A note on organization: The first group of rivers, with addresses and brief descriptions, are those administered by the National Park Service. River mileages, refer only to mileage in parks where there is a jointly administered river. The second group, administered by a variety of federal, state, and local governments, provides only individual addresses to which you may write for further information.

Appalachian National Scenic Trail

The National Trails System Act of 1968, as amended, calls for establishing trails in both urban and rural settings for persons of all ages, interests, skills, and physical abilities. The act promotes the enjoyment and appreciation of trails while encouraging greater public access. It establishes four classes of trails: national scenic trails, national historic trails, national recreation trails, and side and connecting trails.

National scenic trails are to be continuous, extended routes of outdoor recreation within protected corridors. The first two established under the National Trails System Act were the Appalachian and Pacific Crest trails. They wind through some of the Nation's most striking natural beauty. National historic trails recognize past routes of exploration, migration, and military action.

The term national recreation trail is given to an existing trail by the Federal Government, upon application, in recognition of its role as a component of the National Trails System. Today more than 800 of these trails have been designated throughout the country. They are located in every state, the District of Columbia, and Puerto Rico, totaling more than 9,000 miles in length. Most of them, 525, are on federal lands. Of the remainder, 151 are state trails, 85 are local, and 31 are on private lands, and 12 are managed by two or more entities.

Side and connecting trails provide additional access to and between components of the National Trails System. To date, two have been designated.

Since 1968, 35 long-distance trails have been studied for inclusion in the system, and 19 have been designated. The National Park Service administers 14 of them, the Forest Service administers four, and the Bureau of Land Management, one.

The National Park Service encourages all public and private agencies to develop, maintain, and protect trails. With the cooperation and support of a nationwide trails community, the vision of an interconnected, cross-country trail system will become a reality.

The California Trail is a system of overland routes, starting at five points along the Missouri River and ending at many locations in California and Oregon. Over these trails passed one of America's great mass migrations, seeking the promise of gold and a new life in California in the late 1840s and 1850s. Traces of their struggles and triumphs are still evident at many trail sites.

Established Aug. 3, 1992. Length: 5,600 miles.

Running the length of the Rocky Mountains near the Continental Divide, this trail extends from Canada's Waterton Lake into Montana, along the Idaho border, and on to Wyoming, Colorado, and New Mexico, ending at the U.S.-Mexico border.

Established Nov. 10, 1978. Length: 3,200 miles.

The trail runs north from Big Cypress National Preserve and the Kissimee Prairie through various national and state forests to the gulf islands. More than 600 miles have been developed for public use.

Established March 28, 1983. Length: 1,300 miles.

Winding over Wisconsin's glacial moraines, the trail links together six of the nine units of the Ice Age National Scientific Reserve. It traverses significant features of Wisconsin's glacial heritage. Approximately 475 miles are open to public use; additional miles are being developed.

Authorized Oct. 3, 1980. Length: 1,000 miles.

One of Alaska's preeminent Gold Rush Trails, the Iditarod extends from Seward to Nome and is composed of a network of trails and side trails developed at the turn of the century.

Established Nov. 10, 1978. Length: 2,350 miles.
