Step inside the **shafthouse** built in 1902 as part of the Copper Range Mining Co. that operated for nearly 65 years.

Explore the **upper levels** of the shafthouse with our new rock house level tours to see the rock processing machinery just switched off waiting the the next load of rock!

Look through pictures and search for your relative's names in historic company pay ledgers in the **Captain's office**.

Visit the **hoist house** to see where hoist operators worked to lower skips down thousands of feet into the mine.
