DESCRIPTION AND BACKGROUND HISTORY INCLUDING CONSTRUCTION DATE(S), PHYSICAL DIMENSIONS, MATERIALS, MAJOR ALTERATIONS, IMPORTANT BUILDERS, ARCHITECTS, ENGINEERS, ETC.	CURRENT USE <i>Shelter</i>	ORIGINAL USE <i>Shelter</i>
---	-------------------------------	--------------------------------

Shelter. Wood frame set on log and rock foundation; square (14' x 14'); 1-story; wood shake siding (on 3 sides) over round log construction; wood-shaked saltbox roof with slightly extended eaves and extended ridgeline; entrance opening on south. Exterior features include exposed log purlins and rafters.

This shelter was built in the 1930s by the USFS using CCC labor. The CCCs were stationed down lake (Chelan) at 25-Mile Camp, but had a side camp (20 men) in Stehekin for many years. This shelter had new shakes installed on the roof c. 1979-80.

SIGNIFICANCE *Eligible under Nat. Reg. Criterion C: significant as a distinct type of building. This is a good example of a 1930s-era USFS-designed backcountry shelter. It reflects the USFS design ethic of utilizing natural/native materials and siting structures with a sensitivity to the environment. Only a few regulation (designed and built according to USFS standards) shelters stand today within NOCA; most were removed by the USFS and NPS because of changing needs, philosophy, and liability problems. This shelter was built by the CCC. It possesses integrity of location, design, setting, workmanship, materials, feeling, and association.*
