Official Uniform Catalog

**R&R**  
UNIFORMS, INC.

Crater Lake National Park

# R&R

UNIFORMS, INC.

Dear National Park Service Employees,

We are pleased and excited to present our new full line uniform catalog. With the addition of twenty new items, the uniform program for the employees of the National Park Service is now one of the most comprehensive and technically advanced in government service.

Quality high tech companies including The North Face, Sierra West, Gates Gloves, Polypro, Sportif, Fox River, Carhartt, Justin Boot Company and Rocky Boot have been selected to manufacture many of the new items. This will ensure continued high quality in all of the authorized products.

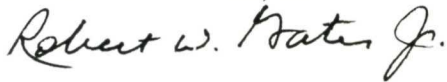

Our thanks and appreciation to the National Park Service management team for all their work in making the National Park Service uniform program what it is today. Presently we have over \$1,500,000 of inventory and 10,000 square feet of warehouse space to serve the needs of the National Park Service uniformed employees.

In addition to the new items, we have updated size scales, measuring and care instructions and ordering procedures. Please review the new catalog carefully to familiarize yourself with all the changes and improvements.

Last year we shipped 97% of the 133,000 items ordered without a backorder. We fully intend to maintain this rate as well as continue to improve on order turn around time.

Thank you for your support and assistance.

Respectfully yours,  
R & R UNIFORMS, INC.

Robert W. Gates, Jr.  
President

# Parka and Overshell System – by THE NORTH FACE

Enjoy warmth and comfort, even in the most severe weather. . .

## THE BENEFITS OF LAYERING

When your body is your only source of heat, you need to keep all you make! That is why our new parkas feature a graduated layering system, a common sense program recognizing that the body is a source of both heat and moisture.

Thin, porous **inner layers** hold heat close and wick perspiration away from the skin. **Middle layers** of medium density conserve heat, manage air circulation and dissipate moisture wicked away from inner layers. **Outer layers** form a rugged barrier to hold precious body heat inside, keep water, wind and cold outside.

**3M THINSULATE® THERMAL INSULATION**, a synthetic blend of polyolefin and polyester microfibers, ensures maximum insulation without high loft. You get all this protection. . . in parkas that are amazingly light-weight and comfortable!  
(Complete your overall layering effectiveness with additional layering items on page 10.)

## C. "Park Peak" GORE-TEX Overshell Designed for Class "A" Uniformed Employees

MADE IN THE U.S.A.

**FABRIC:** 2-ply Taslan Nylon GORE-TEX; all seams sealed with GORE-TEX tape

### FEATURES

- Hip length with inside adjustable waistcord
- Inside knit collar for warmth and comfort
- Two-way front zipper with snapped storm front
- Two outside zippered hand-warmer pockets
- **Zippered side openings for access to defensive equipment**
- Two inside pockets, one with zipper for valuables, one larger with velcro closure for storage of gloves, sunglasses, etc. . . .
- Name and badge tabs
- Choose from two removable full-feature hoods, sold separately. (See "E".)

GORE-TEX® fabric consists of a microporous GORE-TEX® membrane protected on one or both sides by fabric. This membrane, made of 100% PTFE (also known as Teflon), consists of pores 700 times larger than a water vapor molecule (allowing body moisture to escape), while remaining thousands of times smaller than a typical drop of water (to effectively repel rain).

GORE-TEX® has more than four times the water penetration and saturation resistance required by the U.S. Military, and is virtually impervious to wind. Yet it's breathable, allowing more comfort than previously available in a waterproof fabric.

# Ordering Instructions

---

## Filling Out Uniform Order Forms

- Make sure order form is current. The expiration date will be printed on the order form. If the form is out of date, please contact the uniform coordinator at your duty station for current order forms.
- Print name, organizational code, and account number. Be very careful to use correct account number which is the first seven digits of your social security number.
- Fill out all size information utilizing the sizing instruction sheet provided on page 22 of this catalog and enter in space provided under listing of "Important Size Information."
- Since October 1, 1984, your sizes have automatically been kept on file in the computer and are the sizes you will receive on your next order unless you indicate otherwise. All orders and exchanges are now processed through the computer for this size history. Please remember sizes are kept by the lot number of the garments ordered and received since last October, 1984. If you are not sure when you last ordered a particular item, please indicate your size on the order form.
- Enter size in column provided next to description of item ordered. If sizes cannot be determined then R & R Uniforms will use size information provided to determine proper size garments. Any additional information can be added in lines provided for special instructions.

NOTE: We hem all trousers to inseam or outseam measurement. Short, regular, and long referred to in the size scales indicate the rise available. Please see page 22 on sizing instructions for detailed explanation. Make sure inseam or outseam measurement is entered on order.

- Extend and total order entering grand total in line provided. It would be best to double check all figures as a mistake will result in a delay of order being processed.
- Include with order the amount of any overage in check, money order, Visa or Master Card. If Visa or Master Card is used, print card number and expiration date clearly. The minimum amount that can be charged to Master Card or Visa is \$5.00.
- Keep second copy of order for record of purchase.

# Filling Out Exchange Forms

- Print name, park, and account number. Be very careful to use correct account number which is the first seven digits of social security number.
- Use this form for exchanges and returns for credit only. Use regular order forms for new orders.
- Indicate size and quantity received as well as size wanted. For any additional instructions print on exchange form itself.
- Remove the yellow (back) copy for a record of the exchange. Please remove back carbon before exchange form is shipped with return garments. We have had numerous garments ruined because the carbon has stained the garments during shipment.
- Please fill out return address in the space provided indicated by word "FROM" at the bottom of the exchange form. This will speed up return of exchange as this is used for return address label.
- Send the front two copies of exchange form with shipment.
- Prepare return shipping box as securely as possible. The U.S. Post Office and United Parcel Service can be very rough on boxes and have damaged some merchandise.
- All **hats** should be **double boxed** to ensure they are not damaged in shipment.
- We are sorry, but we cannot exchange any garment that has been worn, washed or altered unless garment is defective.
- Any garment found to be defective (other than normal wear and tear) can be returned for exchange or credit at any time.

## Special Orders and Tapering

- For sizes not listed as stock in catalog, please contact R & R Uniforms for special ordering instructions.
- Long tail shirts are available by special order (for extra tall personnel.)
- Shirt tapering is available at \$4.00 per shirt. Indicate in special instructions section of order. Be sure to include in order total.
- Be very careful with your sizes because tapered shirts and special orders cannot be returned for exchange.

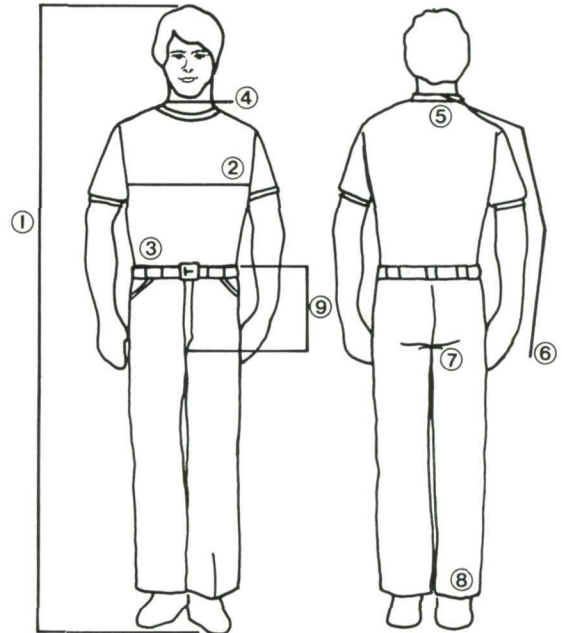

# MEASURING INFORMATION

## MALE

### HOW TO MEASURE FOR SIZE:

Have someone else measure you. Keep tape straight, but not tight. Measure over undergarments or other clothing to be worn under your uniform.

- 1. HEIGHT:** Stand straight against wall in stocking feet. Make a mark level with top of head. Measure from this point down to the floor.
- 2. CHEST:** Well up under arms across shoulder blades and over fullest part. Hold tape firm but not tight. Be sure tape is straight across back and keep it level. Stand naturally.
- 3. WAIST:** Measure over shirt (but not over trousers) at the position you normally wear your slacks. Hold tape firm but not tight. Or measure the waistband of the well-fitting pair of slacks (zipped up and closed) of the same style.
- 4. NECK:** Measure around neck where shirt that is buttoned would fit. Be sure tape measure is neither tight enough to choke or loose enough to sag.
- 5. SLEEVE:** Measure from middle of back of neck at point 5 across the shoulder and around point of elbow to wristbone at point 6.
- 6. INSEAM:** Measure well-fitting slacks of same style along inner seam from crotch seam at point 7 to bottom of leg at point 8. Styles worn with higher heels require extra length.
- 7. OUTSEAM:** Put on the shoes you plan on wearing. Measure from top of waistband to exactly where you would like your slacks to hit on your shoe.

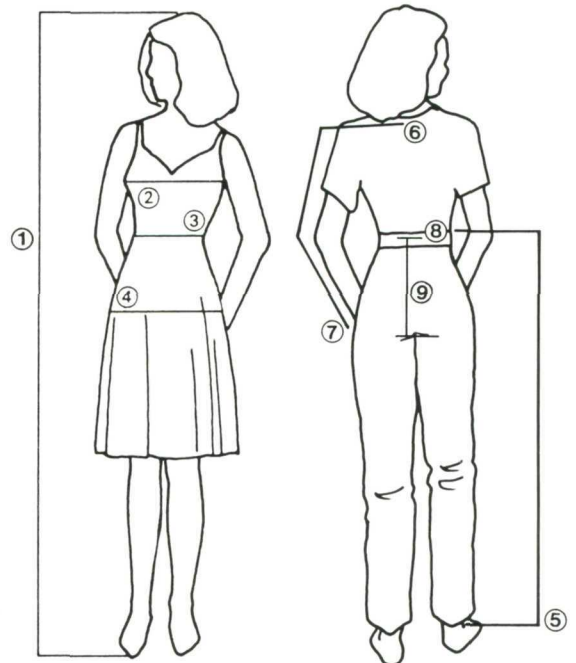

- 8. RISE:** Trousers are sometimes made in short, regular, and long. This refers to rise and is illustrated in point 9. If you believe you wear either a long or short rise please measure both inseam and outseam making note of both on order form. We will then be able to determine proper rise. Please remember 95% of uniforms sold are in regular rise.

## FEMALE

### HOW TO MEASURE FOR SIZE:

Have someone else measure you. Keep tape straight, but not tight. Measure over undergarments or other clothing to be worn under your uniform.

- 1. HEIGHT:** Stand straight against wall in stocking feet. Make a mark level with top of head. Measure from this point down to the floor. (Shoe heels can add inches to your height).
- 2. BUST:** Measure around fullest part of bust, holding tape gently. Keep tape straight and level.
- 3. WAIST:** Measure around the smallest part of natural waistline, hold tape firm, but not tight. Keep the tape level and be sure to stand naturally.
- 4. HIPS:** Measure around the fullest part of hips. Hold the tape measure firm, but not too tight. Keep the tape measure straight and level.
- 5. OUTSEAM:** Put on the shoes you plan on wearing. Measure from the top of waistband, point 8, to exactly where you would like your slacks to hit on your shoe, point 5.
- 6. SLEEVE:** Measure from point 6 at back of neck bringing tape over point of shoulder to point 7 on wrist where you would like sleeve to hit.
- 7. RISE:** Trousers are sometimes made in petite, regular, and tall. This refers to rise and is illustrated in point 9. If you believe you wear either a long rise or short rise please measure both inseam and outseam making note of both on order form. We will then be able to determine proper rise. Please remember 95% of uniforms sold are in regular rise.

# CARE INSTRUCTIONS

## General Maintenance — Dacron and Wool Garments

From: "A Guide To Keep Your Uniform Looking Better Longer"

©1978, Raeford Uniform Fabrics Company.

- Brush your uniform regularly to remove surface dirt.
- When wet, don't dry uniform in direct sun or near extreme heat.
- When not in use, hang your uniform coat and trousers on wooden hangers. Trousers should be hung at full length by cuffs.
- Avoid carrying pointed, sharp or heavy objects on pockets.
- Your uniform is a valuable asset . . . entrust it only to a quality establishment for cleaning and pressing.
- Have more than one uniform and alternate wearings. This will substantially extend the life of your uniform.

## The Problem of Perspiration

Perspiration can have a harmful effect on fabrics. It can result in loss of fabric strength. To prevent this from developing, the following precautions should be taken:

- Dry cleaning solvents do not remove perspiration from a fabric. Affected areas should be called to the attention of your dry cleaner; he will flush them with moisture from a steam spotting gun prior to dry cleaning.
- Although worsted and worsted blend fabrics may not be launderable, a perspiration-affected area may be placed over a towel and blotted with a damp sponge. The area should then be blotted vigorously between two dry towels and hung to air dry.
- For extreme cases, dress shields and the substitution of "T" shirts for sleeveless undershirts, are recommended.

## What to do About Spots and Stains

The following procedures are simple procedures for removing or reducing common stains from uniform fabrics utilizing common household items:

| Chemicals Needed        |                        | Materials Needed |
|-------------------------|------------------------|------------------|
| Rubbing Alcohol         | Glycerine (Glycerol)   | Soft Toothbrush  |
| Naphtha (Paint Remover) | Starch (Laundry grade) | Sponge           |
| Vinegar (White grade)   |                        | Blotter paper    |

| Type of Spot or Stain          | Treatment   |
|--------------------------------|---|
| <b>Butter,<br/>Cooking oil</b> | Sponge and flush with naphtha, feather-out and dry.   |
| <b>Blood</b>                   | Sponge with water, dry; sponge and flush with naphtha, feather-out and dry.   |
| <b>Coffee, Tea,<br/>Catsup</b> | Sponge with water and soak stain in glycerine. Flush well with water, feather-out and dry.                              |
| <b>Chewing gum</b>             | Soak in naphtha and scrape off gum, feather-out and dry.  |
| <b>Chocolate</b>               | Dry and brush off excess, sponge with naphtha and dry. Sponge with water, loosen stain with brush, feather-out and dry. |
| <b>Glue</b>                    | Sponge with water, loosen with brush, flush with water, feather-out and dry.  |
| <b>Iodine</b>                  | Sponge with rubbing alcohol against blotter paper, feather-out and dry.   |
| <b>Mayonnaise</b>              | Apply starch/naphtha paste, dry and brush off excess. Sponge and flush with naphtha, feather-out and dry.               |

# CARE INSTRUCTIONS

## Motor oil, Tar

Apply starch/naphtha paste, dry and brush off excess. Sponge and flush with naphtha, feather-out and dry.

## Mustard

Apply dry starch, brush to remove excess. Apply glycerine for 30 minutes, flush well with water, feather-out and dry.

## Mud, Rust

Dry and brush off excess, sponge with water. Loosen with brush, flush with water, feather-out and dry. Repeat with vinegar if necessary.

## Ink, Ballpoint

Rub white petroleum jelly into stain. Then soak in detergent solution and launder.

## Tree sap

Mix a small amount of ammonia with water and gently rub into spot. After spot has dried have garment cleaned.

## Grass stains

Rub detergent or a pre-wash directly into stain. Clean promptly.

**NOTE:** Most chemicals listed above for spot removal are flammable and should be used in a well ventilated area free of any open flame. After treatment air dry — never dry in a tumble dryer.

**NOTE:** All work should be done with a clean blotter underneath the stain area. 2. "Feathering-out" prevents ringing and is done by starting outside the stain area and lightly brushing towards the center.

**NOTE:** These care procedures are provided only as a service and should not be interpreted as a warranty, implied or otherwise.

## Dacron/Cotton and Dacron/Rayon Permanent Press Garments

- Machine Wash Garments in warm water (DO NOT USE BLEACH), tumble dry (on a permanent press setting), remove promptly. Hang up so that wrinkle will fall out, for touch up use a warm iron.
- For stains spray a pre-wash on soiled area and then wash as instructed above.
- Dry Clean periodically to sharpen creases.

## Care of Polypropylene Items

Wash in cold or warm water. Either drip dry or machine dry **without heat**.

## Care of GORE-TEX. Items

Machine wash in warm water using a mild soap with no additives (bleach, brighteners, fabric softeners, etc.) Drip dry or tumble dry **without heat**. For soiled spots use K2R or a similar product.

## Care of Taslon Nylon and Thinsulate. Items

Machine wash in lukewarm water, gentle cycle, using a mild soap with no additives (bleach, brighteners, fabric softeners, etc.). Drip dry or tumble dry at **no heat setting**.

## Nylon Garments

We recommend you Dry Clean Only. For stains wash stained area with mild soap and warm water.

## Care and Maintenance of Rainwear

- Avoid dry cleaning as the cleaning chemicals often take the plasticizer out of the coat, leaving it stiff.
- Machine wash in lukewarm water with a pure soap only. Never use detergent, bleach or anything with an oxidizing agent.
- Treat badly soiled areas before machine washing by using a brush and a mild non-detergent soap solution in lukewarm water.
- Do not allow the coat to spin dry. Remove it from the machine after the rinse cycle.
- Avoid unnecessary exposure of fluorescent orange side of coat to sunlight as the ultraviolet rays will cause the color to fade. When not in use, store the coat with orange side not exposed to sunlight.
- Store coats carefully only after they have thoroughly dried.

## Care and Maintenance of Uniform Hats

- Hats should be brushed with a long, softly bristled brush.
- When hat is temporarily not in use, it should be placed crown down on a clean, flat surface.
- When hat is not in use, it should be placed back in the box. Make sure the cord and chin strap are removed. The press-stay should always be placed on the hat, as this will assure the rigidity and straightness of the brim.
- Rain covers should always be kept handy for inclement weather. If possible, the cover should be used prior to rain, snow, etc.
- If hat becomes damp from perspiration, the inside leather should be turned out, and the hat should be set on the leather.
- If hat becomes water soaked, (sudden shower, dropping in puddle, etc.) it should be dried naturally, removing the braid and strap, and placing on a clean surface.
- In case of oil staining or spotting, any commercial fabric spot remover will be appropriate. Place the liquid on a soft, dry rag, letting it evaporate almost completely before using it to clean the hat. (Remember that the spot remover's vapors, not the liquid itself, does the actual removing.) Feather out toward the edges of the stain.

## Good Rules To Follow To Preserve Your Hat

- Hats should be alternated in use. Recommended procedure is every couple of days in temperatures exceeding 80°, and once a week is sufficient in cooler weather.
- Experience nationwide has proven that the best way to enter and leave a vehicle is with the hat in your hand. Remember when you enter a vehicle to place the hat where it will not be in a sitting area.
- When storing the hat, place in a cool, dry place.
- You are now wearing the finest trooper headwear available. If you follow these few suggestions, you will be proud of your appearance, and the impression you convey to others.

## Hat Renovation

Felt hats can **sometimes** be renovated. However, R & R Uniforms, Inc. **does not** have renovation facilities. We recommend you locate a local source who can professionally advise on renovation potential.

## Leather Items

- Always polish leather items before use. This will protect leather from scuff marks. Use a high quality cordovan leather polish.

### THE NORTH FACE WARRANTY

All The North Face products are warranted for 3 years from date of purchase to the original owner against defects in materials and workmanship. If a product fails due to manufacturing defect within this time period, we will repair the product without charge, or replace it, at our option.

Repairs due to accident, improper care, or negligence, where we are not at fault, will be performed for a reasonable charge. Please return the product to The North Face Repair Department, 1111 8th Street, Berkeley, California 94710, USA.

California state law requires that products accepted for repair be clean. Cleaning charges will be assessed when a dirty product is repaired.

This warranty gives you specific legal rights and you may have other rights which vary from state to state.
