Mission Statement

The National Park Service preserves unimpaired the natural and cultural resources and intrinsic values of the National Park System for the enjoyment, education, and inspiration of this and future generations. The National Park Service cooperates with partners to extend the benefits of natural and cultural resource conservation, and outdoor recreation throughout this country and the world.

Introduction

Nearly 53 percent of NPS acreage in 45 national parks is designated wilderness; another 30 parks have recommended or proposed wilderness.

Corel Corp. Photo - Denali National Park

Wildlands in the United States are a rare and diminishing resource. Even designated wilderness areas with the highest level of legal protection are threatened by the far-reaching effects of human activities.

Although national research shows that many Americans value wildlands, the public's understanding and appreciation of wilderness today does not begin to approach the depth of those who supported the Wilderness Act of 1964. This situation makes ongoing education and partnership efforts especially critical for maintaining the National Wilderness Preservation System for present and future generations to enjoy.

Support for wilderness preservation must increase for United States wildlands—and all the precious elements and organisms they contain—to survive for future generations. Nearly 70 percent of National Park Service (NPS) total acreage is designated, recommended, or proposed wilderness. Today, a driving force to develop a public appreciation of wilderness is the National Park Service mission to "... conserve the scenery and the natural and historic objects and the wild life therein and to provide for the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations."

Local and regional wilderness education and training efforts by wilderness managing agencies are effective, but they are limited by lack of funding and human resources. The National Park Service Wilderness Education and Partnership Plan is a fundamental step in uniting interagency efforts and non-governmental participants to broaden awareness, understanding, appreciation, and support of wilderness in an increasingly diverse American public.

NPS wilderness education planning will connect with interagency efforts and non-governmental participants.

The Wilderness Act of 1964 requires the National Park Service to manage wilderness lands within the National Park System. NPS management philosophy includes education as an important aspect of managing all resources. Educating NPS staff and the public about wilderness and its management helps the National Park Service fulfill the congressional mandate for preserving wilderness in perpetuity.

The goal of the NPS Wilderness Education and Partnership Plan is to broaden awareness, understanding, appreciation, and support of wilderness in an increasingly diverse population. Such an initiative must reach beyond National Park Service audiences. Because of this, the NPS Wilderness Education and Partnership Plan is designed to connect with efforts involving all agencies within the National Wilderness Preservation System (NWPS) and a variety of non-governmental participants.

In preparing this document, the NPS Wilderness Education Work Group used the comprehensive interpretive planning process from *The Effective Planning of Parkwide Interpretive Programs* as developed by the Interpretation and Education team of the NPS Intermountain Support Office. The group also used the work already accomplished by the Arthur Carhart Wilderness Training Center. The result is a comprehensive interpretive strategy that includes significance statements, interpretive themes, and numerous interpretive program plans featuring specific objectives for addressing NPS audiences.

Purpose

Identify audiences and develop services to connect people with wilderness.

Interpretation provides opportunities for people to forge intellectual and emotional connections to the meanings inherent in wilderness. The NPS Wilderness Education and Partnership Plan lays out a strategy for identifying audiences, developing services, and delivering those services in a thoughtful and coherent manner.

The primary purposes of the Wilderness Education and Partnership Plan are to:

1. Establish the individual elements of the NPS Wilderness Education Program.
2. Establish a priority for funding and implementation of the elements of the plan.
3. Provide for the continuity of the program through the development of an approved and comprehensive work plan.

Create a foundation for interagency wilderness education.

The goal of these actions is to broaden awareness and understanding of the idea of wilderness and to inspire appreciation of wilderness values in an increasingly diverse population. Wilderness education and interpretation must reach beyond National Park Service audiences to increase knowledge of the National Wilderness Preservation System and the NPS role in managing wilderness. Desired results include increased public support for wilderness that results in protection of wilderness resources and preservation of wilderness for future generations.

The NPS Wilderness Education and Partnership Plan also will serve as a vehicle by which the NPS can participate in concurrent initiatives being developed by other agencies and the Arthur Carhart National Wilderness Training Center. This plan will be part of a strategy for a national partnership program for wilderness education that will generate a greater understanding and appreciation for wilderness values among NPS staff and a variety of national audiences and partners.

Significance Statements

Provide connections between legislation and park interpretive programs.

NPS Photo - North Shore, Horn Island, Gulf Islands National Seashore

Significance statements clearly define the important aspects of wilderness. They express the fundamental rationales that provide the connections between the enabling legislation and wilderness interpretive programs at the park level. Significance statements lead directly to primary interpretive themes. All significance statements are equally important and are not presented in priority order.

Significance statements for the NPS Wilderness Education and Partnership Program are:

- a. Wilderness designation provides the highest level of legal protection for some of the most pristine and least manipulated wildlands in the United States.
- b. Lands that qualify for wilderness status are a rare and diminishing resource.
- c. Wilderness provides critical habitat for rare and endangered species of plants and animals as well as protection of other vital components of healthy and diverse ecosystems such as air quality, watersheds, and natural soundscapes.

- d. Wilderness provides a unique learning laboratory for scientific activities and lessons that address natural systems and their preservation, ecosystem management, and stewardship.
- e. Wilderness provides the opportunity to explore societal and personal values as they relate to the use and appreciation of wildlands where humans are temporary visitors, not permanent residents.
- f. Wilderness contains exceptional qualities such as scenic beauty, natural sounds, and opportunities for reflection and solitude that are important for human inspiration and rejuvenation.
- g. The designation and management of wilderness affords opportunities to explore such concepts as preservation, development, history, freedom, interdependence, ingenuity, and land ethics.
- h. Wilderness provides a sense of wildness, which can be valuable to people whether or not those individuals actually visit wilderness. Just knowing that wilderness exists can produce a sense of curiosity, inspiration, renewal, imagination, hope, and potential.
- i. Wilderness provides extraordinary and challenging recreational opportunities, allowing present and future generations the opportunity to experience risk, reward, and self-reliance.
- j. Wilderness provides opportunities for the preservation, study, and further understanding of cultures and cultural resources, including those related to indigenous peoples and traditional and sacred places.

Interpretive Themes

Connect the idea of wilderness to larger ideas and universal values.

Interpretive themes communicate specific messages based upon significance statements. They are the stories through which the values of wilderness are conveyed to the public. These themes connect wilderness to larger ideas as well as universal meanings and values. Interpretive products and services are based upon these building blocks. All themes are equally significant and are not presented in priority order.

The interpretive themes of the NPS Wilderness Education and Partnership Plan are:

- a. The concept of wilderness codified in law originated in the United States with the conviction that some wildlands are most valuable when left in their natural state. *(e.g. social, scientific, economic, educational, recreational, and cultural value)*

Subtheme a.1. The Wilderness Act created a National Wilderness Preservation System which preserves some of the most unique ecological, geological, scientific, scenic, and historical values that the public and Congress have determined require special protection within the National Park System, Fish and Wildlife Service Refuges, National Forests, and public lands administered by the Bureau of Land Management. The Eastern Wilderness Act furthered wilderness preservation by allowing additional lands with wilderness character to be included in the National Wilderness Preservation System. In addition, legislation specific to Alaska addresses some of the unique aspects of Alaskan wilderness.

- b. As a foundation for healthy and diverse ecosystems, officially designated wilderness and other remaining wildlands provide critical habitat for rare and endangered species and play a significant role in the overall health of natural systems worldwide. *(e.g. watersheds, air quality, and natural soundscapes)*
- c. By law, wilderness is managed differently than other federal lands in order to retain its primeval character and natural conditions, and to preserve wilderness as a special place for humans to examine their relationship to the natural world.
- d. Wilderness offers opportunities for personal renewal, inspiration, artistic expression, pride of ownership of a shared heritage, and the prospect of hope for the future.

Subtheme d. 1. Wilderness has inspired and continues to inspire a distinctive genre of literature and art, enriching millions of lives in the United States and around the world.

- e. Wilderness provides opportunities for physical and mental challenge, risk and reward, renewal, self-reliance, solitude, and serves as a haven from the pressures of modern society. *(e.g. exploration, discovery, and recreation)*

Subtheme e.1. Visitor safety cannot be guaranteed, but can be enhanced with proper trip planning, appropriate skill, and responsible behavior. Wilderness visitors must accept certain inherent risks associated with weather, terrain, water, wildlife, and other natural elements.

- f. The survival of wilderness depends on individual and societal commitment to the idea of wilderness and on appropriate visitor use and behavior when in wilderness areas. *(e.g. appreciation, values, skills)*
- g. Wilderness provides a unique setting for teaching ecosystem stewardship as well as science, literature, art, and other subjects using an interdisciplinary approach. *(e.g. civics, outdoor skills, math, music, and others)*
- h. Wilderness contains primitive areas relatively undisturbed by human activities, where scientific research can reveal information about natural processes and living systems that may have wide-ranging applications and may serve as global indicators of ecological change.
- i. Cultural and archeological sites found in wilderness can provide a more complete picture of human history and culture. *(This includes indigenous peoples, conquests, colonialism and resistance, freedom, independence, ingenuity, a sense of connectedness, stewardship, and human survival.)*

Audiences

Seven specific audiences are identified.

NPS Photo - Shenandoah National Park

NPS audiences are part of a broader interagency audience.

The NPS Wilderness Education Work Group has identified seven specific audiences. When the National Interagency Wilderness Education Strategy is implemented, it is expected that the NPS and other agencies will begin to share target audiences. (Each audience includes Internet visitors.)

1. NPS, Concessioner, and Cooperating Association Staffs.
2. Wilderness Visitors.
3. Park Visitors.
4. Students and Teachers of Formal Education Programs.
5. Communities Neighboring Wilderness.
6. Non-government Organizations and Partners (including friends groups who work with the public, mass media, and elected officials).
7. Diverse Non-wilderness Visitors (Americans who traditionally have not visited or valued wilderness) and Non-wilderness Supporters (including other federal agencies, U.S. Military, extraction industries, and others).

These NPS audiences are a subset of a broader public to be identified by the National Strategic Plan for Wilderness Education (*see Appendix A*).

Ensuring outreach education for diverse and multicultural audiences is a priority responsibility of this comprehensive wilderness education strategy. Special emphasis on this objective is included in products for audience number seven. The relative lack of minority involvement in wilderness has been identified as a complex problem arising from economic, cultural, and social factors. In culturally diverse California, Point Reyes National Seashore and Sequoia, Kings Canyon, and Yosemite National Parks already offer significant wilderness outreach programs and partnerships specifically targeted to culturally diverse students. Existing information from these and other successful wilderness education efforts will be integrated into NPS wilderness education products identified in this comprehensive plan.

The Comprehensive Wilderness Education and Partnership Plan Program Overview identifies interpretive products and services planned for each of the National Park Service target audiences. Products and services are identified for completion by the NPS Wilderness Program over the next several years as various fund sources become available. *(For detailed information on many of these products and services, refer to the individual service plans in Appendix B.)*

The development and implementation of the Comprehensive Wilderness Education and Partnership Plan is being conducted at the Servicewide level to better assist parks across the National Park System that have wilderness resources. The only obligation of these parks, beyond incorporation of wilderness interpretive themes in their interpretive programs as required by Director's Order 41, is to avail themselves of these products and services as they become available.

The Comprehensive Wilderness Education and Partnership Plan Program Overview is included on the following pages.

Additional Ideas and Resources Identified for National Education Program

1. *Interactive electronic wilderness computer games* in the style of *Oregon Trail* or *SIM City*.
2. *A Day in the Life of Wilderness* national photo project - (One day national event where photographers document wilderness areas simultaneously. Images can be viewed that day via a special on-line website project. Images are later incorporated into a book and a CD ROM project.)
3. *Photo CD* of great wilderness Images. (Images or screensaver)
4. *National Wilderness Day proclamation* - (Annual event to be held on the September 3 anniversary of establishment of the Wilderness Act.)
5. *Adopt-A-Wilderness Program* - (Participation nationwide for all audiences)
6. *Passport to Wilderness Program* - (Virtual electronic version of a passport book. Includes high quality collectible "stamps" that can be downloaded and traded over the Internet.)
7. *Voices of Wilderness audiocassette* - (Includes voice talent of excerpts by notable conservationists and historic figures related to the evolution of the wilderness idea. Flip side to include natural sound environments.)
8. *Internet Link Graphic* - (A "button" graphic developed by a multi-agency wilderness education planning team. Use by partners - the NWSC and the National Park Foundation, or other appropriate partner, approves donors. Users of the image are identified as contributing to wilderness education and the button links to a NWPS website.)
9. *Partnership Program Package* - (An informational package in the style of the NPS *Nature of Sound* materials provided to non-profit organization or potential donors interested in participating in a multi-agency wilderness education initiative. Package includes information on how to collaborate with the NWPS and provides descriptions of products that have been identified by the NWPS as requiring funding.)
10. *Welcome to Wilderness Expedition for Notable Personalities* - (An agency guided wilderness trip featuring invited individuals representing various aspects of modern culture. Recognizable people and celebrities from various walks of life (music industry, television, film, authors, and more) will participate in an excursion where they work side by side with others and share their personal perspectives about wilderness with the group. The excursion will be professionally videotaped and edited for public television broadcast and public service announcements.)
11. *Urban Wilderness Expeditions* - (A long-term program developed cooperatively by partnership organizations and all agencies within the National Wilderness Preservation System. The goal is to develop a consistent source of funding to bring urban youth into nearby wilderness areas for day trips. Such short excursions will allow those less comfortable with more natural surroundings to become familiar with the wild without being far from home. Celebrity personalities may also participate in such day excursions, drawing additional interest from urban youth through their presence or by way of public service announcements.)

A Unified National Strategic Plan for Wilderness Education

Framework for Development, April 99

Current Situation:

National research and regional polls show that a broad spectrum of Americans value their wildlands. However, recent activities in Congress suggest that while public support for the values of wilderness is broad, it is also shallow, and that while opposition may be narrow, it is deep. In the last Congress, seven legislative proposals and numerous committee hearings challenged wilderness management programs and threatened the integrity of the National Wilderness Preservation System. There were no representatives from the public at the table defending wilderness nor are there currently wilderness champions in key Congressional positions.

By 2005, more than half of the America's population will be of Hispanic, African American and Asian descent (US Census Bureau). If the changing population is unaware of or indifferent to the values of wilderness, public support for protecting and maintaining wilderness will be diminished.

A 1996 survey of wilderness managers in the Bureau of Land Management, Fish & Wildlife Service, Forest Service and National Park Service concluded that wilderness awareness, an appreciation of wilderness values and a wilderness use ethic is missing in large segments of our society. The general public was identified as the number one external audience which would benefit most from wilderness education efforts focusing on wilderness values. Internally, each of the agencies acknowledged the need for employee awareness, understanding and appreciation of wilderness.

A number of effective local and regional wilderness education and training efforts have been implemented by each of the wilderness managing agencies. However, these efforts are limited in scope and are severely constrained by lack of funding and staffing. Non-government organizations having an interest in wilderness have focused their efforts largely on campaigns designed to add acreage to the System rather than on maintaining public support for existing areas. Currently, there is no national, unified strategic plan for wilderness education.

Need:

If there is to be a National Wilderness Preservation System at the end of the next century, support for wilderness preservation must deepen. It must deepen among the managers of the four agencies entrusted with the stewardship of our wildernesses, and among the citizens of this country -- whose will is carried out by the elected officials who hold so much sway over these protected lands. Wilderness visitors already have deep appreciation of the places that they love, but the support of visitors will not be enough. Support from a wide array of Americans is essential. That support is best engendered through increasing the awareness that we all benefit from wildernesses whether or not we visit them. Generating that support is an inseparable part of our mission as wilderness stewards, for we cannot properly take care of these special places without long-term commitment from the American people to do so.

Singlehandedly, neither wilderness managing agencies nor non-government organizations have the resources to generate the level of public support needed to preserve wilderness. Collectively, however, we can pool our limited resources, capitalize on each other's strengths and focus our efforts on developing and implementing a unified wilderness education strategic plan that will ensure an enduring resource of wilderness for present and future generations. It is time to build a coalition for wilderness that crosses agency, organization and user and non-user boundaries to gain broad and deep support for maintaining the National Wilderness Preservation System. It is time to develop, implement and evaluate a national, unified strategic plan for wilderness education.

Strategic Plan Purpose:

Promote and enhance the preservation of wilderness for present and future generations by increasing awareness, understanding, appreciation and support of the National Wilderness Preservation System among the American people.

Appendix A - A UNIFIED NATIONAL STRATEGIC PLAN for WILDERNESS EDUCATION

Arthur Carhart National Wilderness Training Center

Goals:

Increase awareness, understanding, appreciation and support of Wilderness in:

- America's schoolchildren
- Adult populations from diverse cultural, geographic and social backgrounds
- Mass media
- Congress
- Wilderness visitors

Objectives:

Objectives must be developed for each of the goals listed above. Objectives must specify:

- *results* to be achieved
- *specific criteria* to measure degree to which results are achieved
- *time frame* for achieving results
- *target group*

Examples:

- The number of city residents participating in curbside recycling will increase from 200 to 600 by September 30, 2000.
- 75% of all 7th grade students in the Custer County School System will show improvement in math skills by scoring at least 80% on the Smith-Jones Test of Math Competency by the end of academic year 1999-2000.

(From: Successful Grantseeking: A Comprehensive Guide to Developing Proposals, Finding Funders, and Managing the Grantseeking Process by Barbara Bader and Steven Carr)

Actions:

Actions to meet each of the identified goals must be identified and prioritized. It is important that both current and proposed efforts are identified to prevent duplication of effort.

Operational Plans:

Operational Plans must be developed for each action to clarify:

- Action
- Location
- Primary message
- Contribution to unit specific management goals
- Audience
- Initiation date
- Goals and objectives of the action
- Providers
- Logistics
- Staff Time
- Funding
- Duration
- Method of evaluation

Support:

We must gain support for a unified approach both internally and externally from many levels, including, but certainly not limited to:

- | | |
|--------------------------|-----------------------|
| • Field | • Outward Bound |
| • Line Officers | • NOLS |
| • Agency Directors | • SCA |
| • Department | • ORCA |
| • The Wilderness Society | • NAEE |
| • Wilderness Watch | • NAI |
| • Wilderness Inquiry | • NPCA |
| • Prof Guide Institute | • Soc of Am Foresters |
| • America Outdoors | • NAAFWA |

Conclusion:

If we do not embrace the challenge of increasing awareness, understanding, appreciation and support of the National Wilderness Preservation System among the American people, the System, as we know it, will not survive into the next century. It will erode away like sand before the rising tide. Let it not be said that the wilderness legacy we pass to the next generation is but a remnant of that passed to us by Carhart, Leopold and Marshall. Rather, may the record show that, by leadership and example, we reached across agency, organization and user and non-user boundaries; we drew from each others' strengths; we built a coalition to develop, implement and evaluate a national, unified strategic plan for wilderness education; we inspired a collaborative effort to ensure an enduring resource of wilderness for present and future generations.

Key Information from the PROGRAM OVERVIEW

Service	NPS Wilderness Education Resource Package (binder including briefing statements, sample interpretive programs, video, digital photos, publication templates, and PowerPoint program on CD ROM)
Location	Servicewide
Primary Interpretive Theme	All nine primary interpretive themes for wilderness
Audience	NPS staff, especially interpreters and managers, primarily at parks with wilderness
Service Initiated	Year One

Management's Interpretive Intent, Critical Resource Issues, and Subthemes

Management's Interpretive Intent	To provide park management with background information concerning NPS wilderness issues and policy as well as cost-effective tools for park interpretation of NPS wilderness themes.
Critical Resource Issues	N/A
Subthemes	All interpretive themes will be addressed.

Interpretive Goals and Objectives

Goals of the Service	This internal information/education package will provide park management with a cost-effective means for researching wilderness issues, preparing interpretive and educational wilderness programs, and obtaining current information about Servicewide wilderness initiatives.
Park Specific Goals	N/A
Objectives of the Service	Because of this package, NPS interpreters and managers will have the information and tools necessary to convey the importance of wilderness to NPS staff and the public.

Operational Details

Providers	National Wilderness Steering Committee
Service Availability	First edition will be available in fall of year one.
Service Duration	Package format includes materials that can be updated for subsequent additions and revisions.
Maximum Audience Size	NPS managers and interpreters

Additional Information About WildLink

Service	WildLink (available through the Wilderness Information Network at www.wilderness.net)
---------	--

What is WildLink?

WildLink combines traditional wilderness stories and themes with culturally diverse perspectives of wilderness thought. WildLink is composed of two parts: it delivers science, geography, and history lessons directly to culturally diverse high school classrooms via the World Wide Web; and it is a dynamic, fun, interactive, and innovative platform to tell compelling stories about wilderness to Internet visitors.

A new on-line community of WildLink schools will be developed within the larger community of GLOBE (Global Learning and Observations to Benefit the Environment) schools. GLOBE is a NASA sponsored program in which students monitor resource conditions around the world. Over 8,000 schools currently collect GLOBE data. WildLink will connect wilderness resource data to GLOBE observations. In addition, WildLink will foster real-time, synchronous dialogue among resource managers and interpreters and the students in the WildLink schools. A WildLink team, comprised of culturally diverse resource assistants, will work in the wilderness of Yosemite National Park and other areas of the Sierra Nevada, gathering air, water, and vegetation data and conducting restoration projects. Their resource data, journals, photos, and videos will be downloaded weekly onto the WildLink website.

Parallel to the WildLink team's personal and scientific observations, on-line *Link to the Wild* lesson plans will assist teachers in conveying pertinent science, history, art, and geography lessons related to wilderness. Through technology grants to participating classrooms, equal access to the WildLink program will be assured. Available to all wilderness.net/WildLink visitors; the largest component of WildLink provide interactive stories, wilderness timelines, and activities which will shift focus from the traditional Euro-centric story of wilderness to a more complete picture of wilderness from many perspectives (including that of buffalo soldiers and artists).

Why WildLink?

Recognizing the diverse and distinct values of wilderness opens a world of understanding about the natural environment and human history. Wilderness provides reservoirs of biological diversity, serves as an irreplaceable living laboratory for medical and scientific research, serves as a peerless repository for cultural resources and the stories of human/wildlands relationships and provides opportunities for self-reliance and solitude.

Research indicates that the National Wilderness Preservation System, its scientific and historic significance and relevance to our daily lives, and the importance of caring for it remain obscure to the American public. (According to the 1997 National Survey on Recreation and the Environment, less than 50% of persons over 15 years old answered "yes" to the question "Are you aware of the National Wilderness Preservation System?") By 2025, it is estimated that people of Hispanic, African American, and Asian descent will comprise 50% of America's population (U.S. Census Bureau). These cultural groups are currently underrepresented in outdoor recreation areas and in the environmental workforce.

Future demographic transitions will mandate that land management agencies, environmental education organizations, and the K-16 education community make a concerted effort to introduce diverse constituencies to wilderness and outdoor recreation. Young men and women from diverse backgrounds must be recruited and trained for employment in recreation, environmental, and conservation fields. If the changing population is not educated about the natural and historic value of wilderness, public support for protecting and maintaining wilderness will rapidly diminish. WildLink takes a substantive step in making wilderness relevant to a culturally diverse America.
