

*I have been one acquainted
with the night.*

*I have outwalked
the furthest city lights.*

Robert Frost

Yosemite National Park *Wilderness*

Currently, two-thirds of Americans cannot see the Milky Way from their backyards due to light pollution. Many people seek wilderness areas to experience this vanishing resource. Almost 95 percent of Yosemite National Park was designated Wilderness by Congress in 1984. Designated Wilderness is a place that is wild and free, where natural processes happen with little human influence.
