AMERICA'S NATIONAL PARKS

America is filled with glorious treasures—her national parks. Ranging from the rocky New England coast to the plains of the Midwest, from the majestic Alaskan wilderness to the pristine beaches of the Virgin Islands, America's abundant natural beauty and historical heritage is preserved in national parks. Since 1872 when Yellowstone became the first national park, the U.S. national park system has grown to over 330 sites encompassing 79 million acres. National parks play a crucial role in telling the story of America's past, present, and future, and reflect the immense diversity of a nation and its people. Millions of people visit the parks, monuments, and historic sites for recreation, reflection, or enlightenment. They come to experience the exquisite natural beauty of Yosemite or Acadia. Some pilgrimage to sites of historic significance, such as Independence Hall or Appomattox Court House. Others pay tribute to forefathers who fought at places like Gettysburg or Valley Forge. The National Park Service manages these special places for use today and preserves them for generations to come. They are a lasting gift to people the world over to use and enjoy.

Independence Hall

200th ANNIVERSARY OF THE CONSTITUTION OF THE UNITED STATES

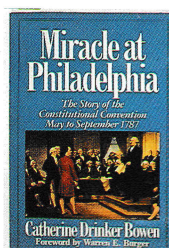

The fight for independence was over, and a new nation was born. The victory inspired exuberant celebrations that rang out across the land. A certain seriousness pervaded the joy, however, for everyone from general to merchant, from lawyer to farmer knew that an official statement concerning the legality of their claim to freedom was needed. During the summer of 1787, 55 delegates from twelve states met in Philadelphia to authorize a united, federal government.

September 17, 1987 is the 200th anniversary of the Constitution of the United States. Over the years, the document has remained universal with only a few amendments added to complete the freedom it espouses. However, before the painstakingly crafted document met with initial approval, the delegates argued heatedly for months. Convention President George Washington was amazed that so many men from different backgrounds could put aside their differences and agree on a common good, terming the effort "little short of a miracle."

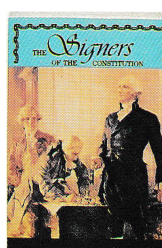

During 1987, many special celebrations will be held at national parks in honor of the Constitution's bicentennial. Here are some interpretive items to help you celebrate this historic event.
