NATIONAL PARK COURIER

National Parks Centennial 1872-1972

STEVE MATHER'S FAMILY NEWSPAPER | WASHINGTON, D.C. | VOLUME 19 | NUMBER 3 | MARCH 1972

A HAPPY COFFEE BREAK between sessions at the March meeting of the Board of Directors of the E&AA association. Shown left to right are Dotty Smith, secretary, from Harper's Ferry Center and HFC representative; Granville Liles, superintendent of Blue Ridge Parkway and representative from the Southeast Region; and Tom Swan, administrative officer from Death Valley and representative from the Western region.

Board of Directors Plan New Programs for E&AA

By Loretta DeLozier

Plans for possible local chapters, special events, an alumni secretary, a chartered trip to the Virgin Islands, an expanded membership directory and a partial-payment schedule for life and founder memberships were among the new proposals approved at the meeting of the Board of Directors of the Employees and Alumni Association held Feb. 1 - March 2.

Chairman of the Board Howard Baker presented an idea for forming local E&AA chapters or linking up with existing organizations in some areas.

"Under such a plan the local chapter would have considerable latitude in their own program interests and objectives," Chairman Baker said. "However, they would automatically be a part of the Employees and Alumni Association and its programs and objectives."

As advantages he cited greater support for national programs through a higher percentage of membership; reduced total membership costs; and the possible broadening of association interests and objectives through greater membership participation.

Ivan Parker, superintendent of Jefferson National Expanison Memorial in St. Louis and the employee representative for the Midwest Region, has already taken steps to set up a local chapter in his area. His will be used as a model for other members and groups interested in setting up local chapters.

Dave Karraker, executive secretary, reported on recent programs held by the members in the Washington D.C. area, including a social business meeting last November and a lunch hour forum on women in February.

"We hope these can be examples to other areas of things that can be done." he sad. "We need to offer a variety of programs, if we are to make the association more meaningful and relevant to everyone."

The Board members agreed to hold at least one official meeting or program during the year in each of their areas.

New Position

Chairman Baker announced that Harthon "Spud" Bill had been appointed to the new position of alumni secretary for the association. His job will be to keep track of all NPS alumni and to compile the annual directory.

Mr. Bill recently retired as deputy director of NPS and has been rehired by Director Hartzog as assistant director. In this capacity he will represent the Director and the Secretary of the Interior at Centennial events around the country this year. He will also continue his work with the commission on concessions.

In addition, Lew Farr was introduced as the representative of the new Denver Service Center. Ed Hummel is replacing Ray Martinez as E&AA treasurer.

Island Tour Planned

Chairman Baker, after reporting on the association's highly successful chartered tour to Alaska last summer, said that he hoped to arrange a similar Caribbean tour in the winter of 1973. The trip would include stops at the Virgin Islands and South America, with a possible optional tour of the Everglades.

Because of the 1972 Centenni-

(See BOARD, Page 2)

Golden Gate, Big Cypress Bills Sent to Congress

Legislative proposals to establish a Golden Gate National Recreation Area in California and a Big Cypress National Fresh Water Reserve in Florida have been sent to Congress.

Both draft bills are part of the program announced by President Nixon in his February 8 Environmental Message to the Congress.

"The Golden Gate Recreation Area, which will serve the 4,5000,000 people of the San Francisco-Oakland metropolitan area, is a key element in the President's objective to provide parks in urban areas, "Interior Secretary Rogers C. B. Morton said.

"It is a companion piece of legislation to the President's proposal to establish a Gateway National Recreation Area in New York and New Jersey, which was introduced last May 10.

"The bill to preserve the Big Cypress Swamp watershed fulfills a commitment made by the President last November 23 to protect this unique ecosystem, which is so vital to Everglades National Park and the entire ecology of South Florida, from development that would destroy it."

Golden Gate NRA

The proposed Golden Gate National Recreation Area would consolidate 24,000 acres of existing State parklands, county and municipal lands, military reservations and private lands into an area offering a variety of outdoor recreation uses.

State-owned lands within the Recreation area would be managed by the State of California with a provision for eventual transfer by donation. The 8,021 acres of private land would be acquired and, where appropriate, leased back to permit continuing compatible use, except for the 61-acre Audubon Society property, which would continue to be owned by the Society as long as it is operated as a bird sanctuary.

Estimated cost of acquiring privately-owned land within the area is $27,620,000. Development costs are estimated at $58 million. Operation and maintenance costs would amount to $2,126,000 annually by the fifth year.

Fresh Water Reserve

The Big Cypress legislation provides for a National Fresh Water Reserve of 584,000 acres, including 547,000 acres of land now privately owned and some 37,000 acres in public ownership.

The bill authorizes up to $156 million over a 10-year period for acquisition of the privately-owned 547,000 acres, and stipulates that publicly-owned land may be acquired only by donation.

The bill provides that the Big Cypress Reserve be administered by the Secretary of the Interior through the National Park Service, but authorizes the Secretary to enter into an agreement with the State of Florida for management of the area.

Newman Is Named Texas Coordinator

Coleman C. Newman, superintendent of Amistad Recreation Area, has been given the additional duties of NPS state coordinator for Texas.

The state coordinator must be especially knowledgeable of the State's special problems and with the economic, environmental or cultural factors affecting decision making in the State, Mr. Kowski, SW Regional director, said.

Mr. Newman will continue as superintendent of the 65,000-acre recreation area, the U. S. portion of the Amistad Reservoir on the Rio Grande near Del Rio.

Morton Announces Limits On Use of Backcountry In Three National Parks

A pilot project to regulate public use of the remote, backcountry sections of three National Parks was announced by Interior Secretary Rogers C.B. Morton on March 1.

Speaking on the NBC "Today" program, Secretary Morton said the program will begin this summer in certain areas of Great Smoky Mountains National Park, N.C. --Tenn; Rocky Mountain National Park, Colo.; and Sequoia-Kings Canyon National Parks, Calif.

The temporary, trial program will be aimed at dispersing users of the remote regions over a wider area and limiting the total number of visitors permitted in a particular region at one office.

Detailed plans still are in the development stage. When firmed up, they will be widely publicized, Interior officials said.

At the Centennial banquet, also on March 1, Secretary Morton announced that to deal with overcrowding in park campsites he is looking at a computer reservation system.

He said that the Shark Valley loop road in Everglades National Park will be closed and a tram train system installed. Free shuttle bus services will begin at Grand Canyon and Mount McKinley National Parks this summer.

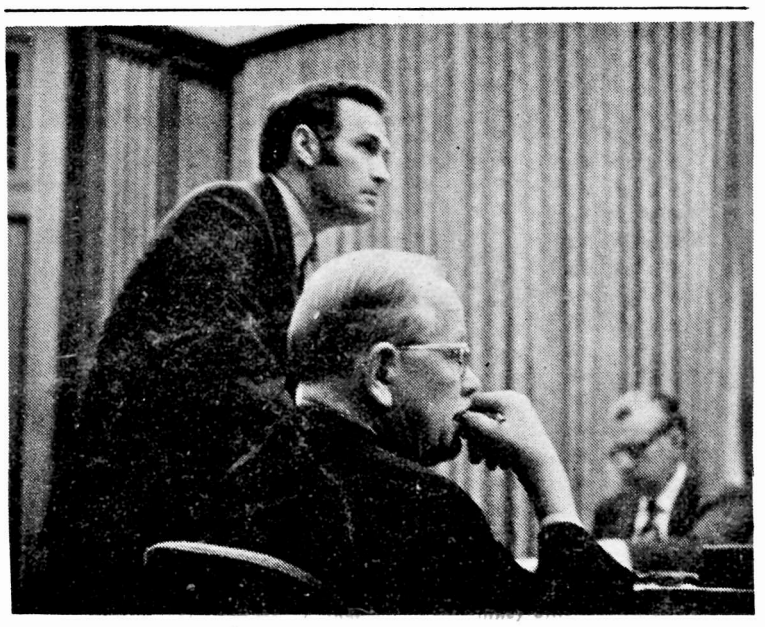

Plans for Youth

The Secretary also said that he is taking steps to communicate more effectively with young people, to give them a better experience in the parks. Among the steps he mentioned were:

- Adding more young rangers to the staffs
- Making law enforcement more compatible with the park environment and less visible
- Providing simple, even primitive, low cost campsites
- Continuing rock music, rap sessions, ecology talks and walks as park of the park programs.

Expanding Parks

The Secretary added, "The park system must be expanded to meet the demand it is going to experience in its second century. Under the leadership of the President we have embarked on an aggressive program to increase the number of parks and to bring them closer to areas of high population density."

NEVADA SENATOR ALAN BIBLE listens intently as Roger Contor, secretary general of the Second World Conference on Parks, outlines plans for the Conference--to be held next Sept. in Yellowstone and Grand Teton--to the National Park Centennial Commission at its meeting Mar. 1. Contor also described plans for the National Park Symposium to be held April 13-15 at Yosemite National Park.

Photo by Len Volz

Another view of the late Al Rose riding a "Fointwinder" when he was chief ranger at Mount Rainier about 1948.

Mystery Ranger Stirs Memories

By Jean Bullard

Our FLYING RANGER MYSTERY has been solved by many COURIER readers. From the answers in our mail we've decided nearly everyone has lived at Mount Rainier (including this writer).

The unidentified photo which appeared on page one of the January COURIER was taken by Len Volz who phoned to tell us it was of the late Al Rose, at that time chief ranger of Mount Rainier. Len told us it was a homemade litter constructed by Bill Butler, former assistant chief ranger now retired.

"The contraption he is on is an Aika," wrote Ken Ashley, assistant superintendent Blue Ridge Parkway, who was the first to solve the mystery for us.

"The Aika was a foreign made rescue sled which someone who had best remain anonymous, suggested that the park acquire. The park did, but it proved so heavy, cumbersome and complex to assemble that it immediately became the laughing stock of the Mount Rainier rescue cache.

"To show their good humored scorn for it. Al Rose was seated in the cockpit, handed a surplus stearing wheel, propeller and some ski goggles and asked to fly the S.O.B."

"Al Rose is hamming it up," wrote Gordon Patterson of Pinnacles.

Robert K. Weldon, a ranger who retired in 1967, commented, "Al had a dry sense of humor."

Sue Wilsie, superintendent's secretary at Mount Rainier, correctly identified the photo and suggested that we check further with Len Volz as "He was probably the 'designer' of the 'flying object', especially the 'added appurtenances.'"

"Fly The Patient Out"

"With the help of Al Dewing the automotive shop supervisor, Merle Potts and others, an old automobile radiator fan, with a broomstick as a shaft, was attached to the end of the vehicle," wrote Curt Skinner, retired assistant superintendent of Mount Rainier. He and Al Rose composed this caption: "If all aforesaid methods fail, set up as shown and fly the patient out."

The report, with photographs was mailed to the Washington Office where it "Diasppeared into the maw of general files without comment."

"In those days," Keith Miller, superintendent of Acadia, commented, "there was a shortage of vehicles so everything that had a wheel was used. The only difference was getting it licensed."

Bill Butler was also mentioned as creator of the litter in a letter from Les McClanahan, superintendent of Wind Cave. Les, said that Wind Cave's chief of I & RM, Alvin W. Peterson, concurred with the facts, as he was a park ranger at Rainier during Al Rose's tenure.

"A Fointwinder" Claims Meuse

Most erudite response was from William E. Meuse, Jr., historian from Saratoga. He claimed it was "a rather crude example of a fointwinder."

"It is clearly evident," wrote historian Meuse, "that the photograph on page 1 of the N.P.S. *Courier* of January, 1972 depicts a rather crude example of a fointwinder from its declining period (1885-1920).

"As every scholar of folk implements well knows, this device's history on this continent may be divided into three basic periods, e.g. Rudimentary beginnings, 1607-1795 Peak period (owing to the discoveries and developments of Decimus Septimus Wigham) 1795 - 1885 and decline, 1885 - 1920.

"Although several reproductions of various model fointwinders have been attempted for living history use, notably those in fiberglass by Owen Gordon for Morristown and in mahogany and gutta-percha by John Anson for Saratoga, it can be safely stated that the last true representative of the "Fointwinder Age" was this model built in 1916.

"This correspondant has reason to believe that the particular fointwinder shown in the photograph is the one stolen from the Farmers' Museum at Cooperstown, N.Y. in the early morning hours of Sept. 22, 1965. This winder was on loan from the Wright Brothers museum at Kitty Hawk, N.C."

"The contraption is a pre "Aika" wheeled litter with certain modifications," said R. L. Rogers, Chief of I & RM from Isle Royale

A Stokes Litter Basket

The photo was called a "gag shot" by Gordon Bender who said it was made of a Stokes litter basket mounted on a bicycle wheel with a pair of skis on the rear to remove injured people also over snow covered terrain. Gordon went on to tell about Al Rose's sign.

When Gordon was at Mount Rainier they used hand stop and go signs for traffic control.

"For Al Rose we made one that showed STOP on one side and on the other GO TO HELL. He would use this device effectively and quite appropriately in his office, especially when one of his park rangers was giving him a bad time. I speak from experience!"

Champion of Fun

"This photo was taken for FUN," wrote Doug Evans, chief interpreter, Lake Mead. "This now obsolete word describes a marvelous joy which once prevailed among the people of the National Park Service.

"Chief Al," he continued, "was a champion of fun. He not only lived a full and joyous life, but he radiated his joy to all around him through a warm and sensitive sense of humor. We miss him, his ways, and his days."

Assoc. Board Plans New Programs

(From Page 1)

al activities, no trip is planned this year. However, the association is planning special festivities for former Yellowstone National Park employees and their families in early September.

Chairman Baker also announced plans for publishing a Centennial Year report on the E&AA, with a complete directory of all members.

New Payment Plan

On Trust Fund Officer Earl Semingsen's recommendation, the Board agreed to set a definite time table for payment of $100 Life Memberships. Payment can be spread over five years; and as a double benefit, the annual payment would cover that year's membership in the E&AA.

The members of the Board also pledged themselves each to seek out at least one $1000 Founder Membership.

Money from all life and founder memberships is put in the Trust Fund. The principle of this fund is not spent; however, the interest on it may be used for operating expenses.

Ray Martinez, former treasurer, said that the total in the Trust Fund as of Dec. 31, 1971 was $13,175. The balance of operating funds was $1,915.50.

Mr. Martinez also announced that over $6400 is now available for no-interest educational loans to E&AA members. Forms for obtaining these loans are available from Executive Secretary David Karraker.

Women's Programs

The E&AA Women's Representative, Edna Caresia, reported on the activities of the various chapters of the NPS Women's Organization, headed by Dagmar Robinson.

The women were particularly active last year in earning money for the E&AA Educational Aid Fund. Many of them have also served as Volunteers in Parks (VIP's).

Carole Scanlon, coordinator for the Centennial Women's Program, outlined the Centennial activites that women are working on this year, based on reports sent to her from four Regions.

"Many of these are on-going programs," she said. "However, by linking them up with Centennial activities, they'll be given an added boost. And, hopefully, many of them can be continued long after the Centennial year is over."

Hartzog Commends Group

On the last day of the meeting, Director Hartzog met with the Board and they reported on their plans and activities.

The Director emphasized his continued interest in the association.

"You've done a fine job this year," he said. "I'm proud of all of you.

Everglades Man Earns Award The "Hot" Way

At Everglades during a major fire Wallace J. Key, Auto Mechanic at Everglades, proved once again that NPS employees sometimes go far beyond the call of duty as evidenced by the following letter he received from his regional office:

"Mr. Robert L. Peterson, Park Manager, has recommended you for a Special Achievement Award based on your unusual competence during an emergency. The recommendation states that during the "Gotcha Fire" a Thiokol fire-fighting unit became inoperable on the fire line and you were flown in to make temporary repairs. We understand that be the time you were able to perform the necessary repair work and drive the Thiokol out of the area the fire was within fifty feet of the unit.

We realize that you went far beyond the call of duty in order to save a piece of expensive equipment and we commend you highly for your competent performance in the face of extreme personal danger. We are pleased to be able to present you with an award in the amount of $200 for this act."

A Fishy Problem

A salmon, swimming up the Columbia River to spawn, passes under the jurisdiction of at least twelve federal agencies. And we think we have problems!

NPS Alumni Notes

By Herb Evison

Hugh Peyton

In the years since he retired from the superintendency of Grand Coulee National Recreation Area--after healing some rather sick Public relations there--Hugh Peyton has gone full circle as to the best way to enjoy retirement. Writing about it early in February, he reported:

"At first we followed the geese north and south with the seasons for some time. We soon discovered that the geese were not too smart, for they had a tendency to lead us into areas of smog, crime, and other benefits of our so-called civilization."

This phase was followed by "an insane desire to own a home and a piece of the earth's crust." After buying a couple of lots, with the intention of building a home on them, they discovered another place--this one with a view--so they abandoned the first and settled down to the job of putting into good repair "the sagging dwelling" that was on the new site. What with painting, sawing, and hammering, "all the while chortlin in ghoulish glee at being unhindered by Master Plans, architectural restrictions and other tabus that once pestered my existence when I was a bureaucrat," Hugh's waistline underwent a steady shrinkage.

"It was a sunny day. On a ladder with a paint brush in hand I reached upward, which caused a contraction of my belt line. . . . My trousers fell down just as the local preacher's wife walked by. It was the last straw. Next day a pligrim from Pasadena came by with smog-filled eyes and bought all our holdings."

"Here" in McMinnville, Ore., "we live rather quietly, range far and near when the weather permits, can leave any time, and do not have to worry about our possessions. Sometimes I do soak my typewriter ribbon in sulphuric acid and sound off on various subjects such as the Oregon Dunes Seashore fiasco. Move about with not quite the ease, grace and alacrity that I did when chasing poachers and fighting fire, but do alright, inasmuch as I am on level ground and in no hurry to any place." The present residence of the Peytons is a trailer camp on the Pacific Highway.

The Albrights

Horace and Grace Albright were back in the Washington area briefly over the week end of January 29. On the evening of the 28th they were guests at the White House dinner given by President Nixon in honor of Mr. and Mrs. DeWitt Wallace, founders and editors of *The Reader's Digest* on the 50th anniversary of the establishment of that publication.

Golda White

Robert P. White was for many years park engineer at Great Smoky Mountains National Park before his transfer to the former Eastern Office of Design and Construction. After his death. In 1960 his widow, Golda, returned to Gatlinburg, where for 8 seasons, she worked for the Great Smoky Mountains Natural History Association. She and her sister lived in an 8-room house some distance out of town. Just before Christmas 1971—after a Caribbean trip with several friends—she sold the house and moved into an apartment "centrally located, where my friends can drop in easily and I can walk to church, post office , and market, if I wish."

No longer having a garden of her own to look after--and after "having screamed louder than anybody else" about the state of the garden of the church she attends,-the mission council put me in charge to work with the men who did the mowing. It has been fun and there have been most favorable comments on the improved conditions."

Between looking after the church garden and playing bridge, Golda manages to visit regularly with several old friends who are shut-ins.

Herb Evison

Herb Evison underwent surgery at the Frederick (Md.) Memorial Hospital on February 17, and was expected to remain there for a week or more. This was the result of a torn cartilage in his right knee, injured in a fall late in November.

Ruby Taylor

Ruby (Mrs. Otis B.) Taylor reported at Christmas time that she was once more back in her own home at 1105 Muse Street, Laurinburg, N.C. 28352, and had been since mid-July. Her return there followed a nine-week visit with old friends in Richmond, after many months of recuperation from surgery at the home of her sister, also a resident of Laurinburg.

Newton Drury

"Thanks for your over-laudatory column in January *National Park Courier* about your elderly colleague, and also for your appraisal of the Save-the-Redwoods League," Newton B. Drury wrote on February 8. "You are most kind, and I hope we can live up to your opinion."

The former Director added that John D. Coffman, former NPS Chief forester, now nearing 90, had been in the Alta Bates Hospital for some time because of a heart condition; a call to John's wife, Robbie, early in February revealed that the doctor had sent him home but that he was not yet receiving visitors.

Newton also reported that Lawrence C. Merriam, retired Director of the Western Region, and his wife Katherine were celebrating their 50th wedding anniversay on February 12. Their sons, Lawrence, Jr., and John, and their wives were scheduled to go out to Berkeley from their homes in Minneapolis and Washington, D.C., to help celebrate the great occasion.

Edmund B. Rogers

Edmund B. Rogers, 80, superintendent of Yellowstone National Park from 1936 to 1956--longer than any other man in the park's history--died in a Denver hospital, after a brief illness, on January 30. (See Feb. Courier, page 4).

Writing about him the day after his death, Horace M. Albright had this to say about Ed Rogers:

"He graduated from Yale I think in 1915 and returned to his native Denver. He was a bank offical in 1929, when I persuaded him to take the superintendnecy of Rocky Mountain National Park, at the time I moved Roger W. Toll to Yellowstone to succeed me as superintendent. When Roger Toll was killed in an automobile accident in early 1936, Cammerer moved Edmund Rogers to Yellowstone and he stayed there for 20 years, being succeeded by L. H. (Lon) Garrison.

"Ed was an active member of the Colorado Mountain Club and the Cactus Club, a club like the Cosmos Club, whose members were professional men, scholars, etc. Both Edmund and his famous brother, James Grafton Rogers, were favorites at the Cactus Club. Jim Rogers was one of the founders of the Colorado Mountain Club and was president of it and entertained Mr. Mather and me in March, 1915.

"Edmund was a very personable man and he administered Yellowstone Park well. I always had the highest admiration for him."

Horace's letter also made mention of "his great research project, when he looked up every item of legislation relating to all the western parks, and compiled a monumental library of reference material for these parks."

This project was started many years before Edmund left the superintendency of Yellowstone, back in the years of World War II. It began as an effort to determine the origins of the land-use philosophy exemplified by the national parks and of the "forest reserves," as the national forests were known until their transfer from Interior to Agriculture in 1905. During the quiet years of the war, he was able to make a good start on the project. "I had the false idea," he said in a taped interview in 1962, "that I would find all this hidden in the files of Yellowstone Park, which went back to 1872. But it soon developed that this would not be adequate, so I began to pick up the other national parks, sticking entirely to the national parks proper."

After the war, with the impact of heavy travel on Yellowstone, this work "became a Saturday and Sunday affair. The way I arrived at it all was to start out and accumulate everything I could in connection with any national park. I probably read more Congressional Records than anybody in the Park Service, probably than all the Park Service combined ever read. And I indexed all this material."

Some time later, the Director's office became interested in the project and supplied varying amounts of money that enabled Edmund to get copies of material from the Library of Congress and other sources. When the time came to retire, Director Wirth suggested that he put in full time on completing the project. On Nov. 1, 1959, he opened up a small office in Denver, close to the Denver Public Library--a great source of the kind of material he was seeking. There he worked for 3½ years. "Then when I completed it--the basic indices--the money ran out and I dropped it and retired."

It might be added that the voluminous collection of source material was extensively consulted by Dr. John Ise in the preparation of his book, "Our National Park Policy."

Howard Stricklin

Howard R. Stricklin, retired superintendent of Grand Canyon National Park, is cited in an interesting and diversified exchange of correspondence in the Autumn 1971 issue of *The Living Wilderness*. The exchange, which occupies 12 pages of the Wilderness Society's magazine, relates to the move, early last year, to censor the column which Mike Frome had been contributing to *American Forests* and which resulted, last July in the American Forestry Association's executive committee dropping the column without explanation.

Howard wrote, addressing Editor James B. Craig:

"I was a National Park officer--ranger, chief ranger, and park superintendent—for 35 years, and for a good many of those years I have read every issue of *American Forests* from cover to cover. I consider it the best, by far, of any conservation magazine on the market today.

"Imagine my consternation, then, when I read Stewart Udall's column of April 23 in the *Arizona Republic* entitled "Lumbermen Raid National Forests." In it, he said that on March 4, William Towell, executive vice president of the American Forestry Association, sent a letter directing the censorship of Mike Frome's column, divesting it of criticism of the U.S. Forest Service, the forest industry, and of controversial forestry issues.

"Now I don't always agree with Mike Frome, who has tongue-lashed the National Park Service just as enthusiastically as he ever has the Forest Service. Just the same, his column is one of the reasons I think the magazine is so great--as Stew Udall puts it, he's staunchly independent and he pulls no punches. If his column is emasculated by censorship of what is controlersial and critical, and if this kind of thinking is going to color the editorial polices of *American Forests* magazine, I'll want no more to do with it, and I think I'm speaking for a majority of its readers.

"I hope you can assure me that censoring Mike is not going to happen.and that you and the editorial policies you have been following will centinue along the lines that have made *American Forest* a great and progressive publication in recent years."

Courier's Own Gentleman

By Alan Kent

There is in the world a *gentleman*. He is listed in the masthead of *The National Park COURIER* as "Contributing Editor: Alumni." He spends an awful lot of time focusing on others. In fact, he has made a career out of it. Now it seems appropriate to say a few words about him.

On the day affter Thanksgiving, Herb Evison slipped on the ice in front of the Frederick, Maryland library building, and hurt his knee.

Herb was operated on in mid-February and while the surgery was successful, a serious case of continuing hiccups brought post-operative complications. Now he is up and around on crutches and taking out-patient therapy to permit him to discard them in short order.

Herb and his good wife, Shirley, are independent spirits and keep telling their neighbors who ask if they can help with anything that all is well and no assistance is necessary.

In his active retirement, Herb has continued his deep interest in the National Park Service, has made major contributions to the success of the *COURIER* and, in the Service's Oral History Program, Herb has compiled much rich data that is permitting, in this Centennial year and in the years ahead, historians and journalists to tell the story of the Park Service "like it was."

We wish Herb a speedy recovery and a return to the tape recorder as soon as possible. He and Shirley are looking forward to the marriage of a granddaughter and that should provide a needed antidote to the Evisons' rough winter.

Editorial

"Gift" Prompts Reply

We received an unusual and disturbing "gift" recently---yellowed and battered copies of the first two issues of the original Newspaper of the Employees and Alumni Association. A note was attached which said: "I was a charter member of the E&AA and although I worked for the NPS for many years apparently never have been considered one of the Alumni. I'm sure there are many others."

Unfortunately the writer did not sign his name, so we are unable to rectify the error or, for that matter, to find out exactly what he or she meant. However, even before we received the note, the E&AA had already begun taking steps to avoid such problems, and we feel that everyone should be aware of what is being done.

In the past Betty Koubele, vice-chairwoman of the Board of E&AA, has done a commendable job of compiling the voluminous "Directory of Retired Employees." Plans are now underway to include *all* alumni in this directory, whether they retired or left NPS for other jobs. At the recent E&AA Board meeting, representatives included in the new budget the cost of printing a Centennial year report which will also contain a directory of all E&AA members, both employees and alumni. Executive Secretary David Karraker is now compiling regional lists of all members, to help representatives know the members in their region.

Also, the Board has stressed the need for more information to be given to all retiring NPS employees at their exit interview. Betty Koubele has written all of the NPS personnel officers, asking them to do so. In addition, the Board has asked Harthon Bill to serve in a new post as the E&AA's Alumni Secretary. Since his job is to keep track of alumni and to put out the annual directory, the chances of forgetting someone will be greatly reduced.

One Postscript: maintaining lists is an awesome task, considering the thousands of present and past NPS employees, and keeping track of every one of them is impossible. However, any of them can become members of the E&AA--all they need to do is write in and send their check or money order. That's the easiest way to be remembered—become a member!

Peeking at the Past

Another postscript: we couldn't resist re-reading those old E&AA newspapers, and we thought perhaps others would enjoy knowing what's in them too. Published twice a year, the paper contained six pages. Earl M. "Tiny" Semingsen was the first editor, assisted by J. Estes Suter and Elsie Donnellan.

The first two issues had, among other things, an early picture of Luis A. Gastellum in a checkered bow tie and a line-up of bearded employees from Gila Pueblo, Colo; intriguing headlines such as "Guess Who Will Replace Lon Garrison," and "Raise in Salaries Only Need at Carlsbad Caverns." One interesting (prophetic?) article stated that George B. Hartzog, assistant superintendent at Rocky Mountain National Park, had become the first NPS employee to receive the prestigeous William Jump award which annually honors a young public administrator. He was cited for his "outstanding public service, and especially for his invaluable assistance in the preparation of concessions policies and the Management Manual for the National Park Service."

The real "grabber" is the lead story in the first issue, which gives the history of the E&AA. Endorsed by NPS Director Conrad Wirth, the idea for the association was first voiced in 1950 and grew steadily until, during the "Public Services" conference for superintendents at Gatlinburg, Tenn. in Sept. 1955, Tiny Semingsen announced that for $1.00 he would furnish each person a membership card in the E&AA. "Fifty-four dollar bills were literally thrown at him." By the evening of Sept. 24, 1955, charter memberships had reached 202 and by June 15, 1959 over 600 memberships had been issued. (Current membership is over 2,000).

Final postscript: Tiny Semingsen, now retired, is still one of the most enthusiastic and active members of the E&AA and is currently the association's Trust Fund Officer.

—Loretta DeLozier

Letter

Dear Editor:

It seems that whenever a new employee of the NPS points out a problem in administration, interpretation, law enforcement, or maintenance...the comment comes back that, "we've always had this problem".

It seems to me that we are not only likely to lose a good many employees if we continue to answer in this vein, but...if the comment is true, then we should admit also that something has "always" been wrong!

At the moment I happen to be concerned about research. We are all well aware that many of the larger parks have a good many problems with political and public pressure on the environmental front.

These larger parks seem to have decided to deal with these areas of pressure by bringing in research biologists, research archeologists, social scientists, etc. There is on effort to study what should be done done about elk, or alligators, or smog, or collapsing ruins. However, nothing seems to be done with regard to the research needs faced by small parks and monuments.

Incomplete Records

At one small park, there is a range of plants and animals within one square mile that is usually found through three life zones. No one has been permitted to collect or study this community on anything other than an insufficient level. (The last permit granted was for 1 day of specimen collection.)

I consider us negligent in our management when we do not have a reptile list; have only an incomplete plant collection; no bird study collection (nor exhibit of birds); and incomplete records of animal sightings. We simple have no idea of the resources we supposedly protect.

This lack of information is due to some measure to the type of training of assigned personnel. But even when trained individuals were assigned here, they were required to spend every day (except when on summer fire fighting or intermittent patrol) on the information and fee collection desk. These personnel were simply unable to do any information research. Sufficient personnel to relieve them of their desk duty is not available.

If anyone has suggestions on how the smaller parks could get some research assistance; how we could get some exhibit assistance without it being 10 years late; and with administrators who don't believe in research....we would appreciate hearing.

(Name withheld upon Request)

Guest Editorial

Low Staffing--Why?

By Marion Riggs Durham

The NPS continually suffers from insufficient staffing. Whether the unit is a regional office with hundreds of employees or a small area with five people, the problem is identical. And my question is, do we bring it on ourselves?

Have we decided that ceilings and budgets are unbeatable, and therefore "we can't get approval for more help"; have we decided it isn't worth making a request for more help, so no one even knows of our need; are we making excuses for our lack of initiative?

Worse yet, have we decided that the NPS can do its job - can make it - on uncompensated overtime? Is it that praiseworthy to get the job done at the expense of our hard-earned time off? I don't happen to believe that the Park Service needs to be a free loader.

Cutting Services

If budgets are cut, and park standards can't be maintained, then let's do what any business would do...cut back on services. Let the people who own the parks - the public - realize that quality can not be maintained at free loader prices.

We could cut our hours, close off areas or close out sales services; we could stop collecting fees, stop building picnic sites, stop resurfacing roads.

We should continue offsite talks, but stress our management needs instead of give travel talks; we should continue visitor contacts, but get out of the visitor center and onto the roads and trails; and talk about our problems. We should be honest about our lack of research, our lack of knowledge, and our lack of money.

But, unless we stop our terrible personnel management practices, and until we start using the abilities of our staff, we won't make any better use of increased money and personnel than we do of the present supply.

There are in the NPS a considerable number of fantastic managers; there are also too many that are ruining the people under them. When a person who does not know how to deal with people on a humane basis is placed in charge of a unit, how can we expect ANY of the resources of that unit to be protected?

The NPS has tried to change its personnel policy by hiring "less highly trained" people for the face-the-public jobs; this supposedly puts the "more highly motivated" person into a position of responsibility and keeps them satisfied. It's a bunch of hokum. First, if we hire poorly motivated people to meet the public, we fall down on our primary responsibility of public service; second, motivation has very little to do with education; third, a trained biologist is no more happy in management than behind an information desk. We still fail to use abilities where they are suited. And when personnel *are* permitted to use their abilities, the tendency is to seldom consult and follow their advice.

Why bother to research tree disease if the manager says trees die of old age? Why bother to find a new way to handle fiscal accounts, if the manager says the only way is the way it's done now? Why bother to hire an artist & then tell him how to do an exhibit? Why should initiative be so stifled?

Don't Poison Morale

If stated policy for the NPS is to succeed; if our standards are to be met with high quality, we will need to stop penalizing ourselves on staffing. With whatever staff we have we must practice sensible personnel dealings so that we get the most out of the talent without poisoning morale.

Everyone at the highest leavel can issue policy statements forever; but if the guy on the bottom, *who puts that policy into practice* doesn't have decent morale and doesn't feel part of the overall plan...Then policy statements from on high may as well be flushed down the john.

Some interesting policy decisions have been made recently about putting two people in Hank Schmidt's office to listen and talk to field personnel. This is a great step in the direction of better communication.

However, until management in the field can begin to treat their personnel like human begins, and not be afraid of capable and trained people beneath them...I fear that the Director's efforts are in vain. We need help down here in the parks...help with more workers, help with decent suppervisors, and encouragement to try some things on our own. Let's stop penalizing ourselves!!!!

Marion Durham is a park ranger at Walnut Canyon National Monument. Her views are her own, and not necessarily those of the E&AA.

In Santa Fe, Happiness Is A Truck Load of Tin Cans

By Don Pledger

A milestone reached in Santa Fe in January has brought happiness to a large number of citizens, including members of the NPS Women's Club. The only complaints came from three or four disgruntled tin can munching billy goats.

The day that 15,550 pounds of flattened tin cans were unloaded at a foundry in El Paso, Texas to be melted down into new products meant that the first of several goals had been reached by an environment conscious group.

The eventful day was the culmination of the first phase of a can recycling project by the Santa Fe Branch of the American Association of University Women. The endeavor spanned 10 months, involved hundreds of volunteer man hours — and women hours—and the help of numerous organizations. And it's not over yet.

Santa Fe Women Work

Four prominent members of the recycling committee are also active members of the NPS Women's Club of Santa Fe. And any of the four will tell you that "prominent" as used here is synonymous with "working."

Mrs. Stanley Broman is chairman of the recycling committee, Mrs. Robert Pozel is in charge of radio publicity, Mrs. Fred Quesenberry heads up the group that sorts out the aluminum cans from the others, and Mrs. Volney Westley rounds up and organizes "volunteers" when work is to be done.

Unforeseen problems slowed the project, according to Mrs. Broman. "The planning and soliciting of outside help was time consuming, and four months went by before we were ready to accept our first can. Then followed six months of selling the idea to the public, sorting, flattening, boxing, and storing thousands of cans, and finally loading the truck."

Mildred Broman is a living example of the type of person often called on to chair projects such as this. Presently an officer or active member of no less than five other organizations, she has a history of accomplishment.

Shirley Quesenberry has involved most of her family in the tin can business, including teenage daughters Lynn and Nancy, and sometimes husband Que. "Actually, my children got me started -- they were always after me to get on the environmental bandwagon."

"We hope this is just the beginning," said Jan Pozel, busy mother of three children. "Our goal is to get the community involved in all phases of recycling, and environmental improvement in general."

"NPS women are 'naturals' for projects such as this," Katie Westley, president of the Santa Fe NPS Women's Club, said. "Conservation is something we live with, and I think it is especially important that we take an active part during the Centennial year."

Others Help Too

Committee members emphasized that a large number of people and organizations must cooperate and donate services and materials to get a recycling project off the ground. In Santa Fe, events progressed something like this:

An architect designed a gazebo. A Carpenters' Union supplied seven carpenters who built three gazebos under a construction company shed, using wood donated by five lumber companies. Paint was donated by two stores. A crew from the City Parks and Recreation Department transported the gazebos to three different shopping center locations.

The City donated nine collection barrels and agreed to help pick up and deliver cans to a warehouse that donated space.

Citizens had to be sold on bringing in cans. A Boy Scout troop was called on to help. A trucker willing to haul cans had to be located, etc., etc.

Sounds like a lot of bother? No doubt about it. But the success of the Santa Fe campaign is convincing proof that it can (pun intended) be done when a group of determined ladies decide to get involved.

Photo By Fred Mang Jr.

Caught working at one of the AAUW tin can recycling gazebos are three members of the Southwest Region Women's Club. Left to right are: Mildred Broman, committee chairman: Katie Westley and Shirley Quesenberry.

Awards at Cape Cod

Natalie Fletcher

After retiring to Nova Scotia, Natalie Fletcher returned to Cape Cod for a visit and for a Seashore coffee hour when she was presented with a Superior Service Award.

Natalie Fletcher had a highly effective NPS career as Secretary at Cape Cod and Assateague Island National Seashores.

As a native of Massachusetts she brought to her Cape Cod position a wealth of knowledge and experience gleaned during the years she was Town Clerk and Treasurer for the Town of Wellfleet. During her tour of duty at Assateague Island National Seashore, she proved to be extremely knowledgeable in the field of personnel management. She developed a system for handling personnel actions which assured complete processing accuracy and timeliness.

Later this system was applied with equal effectiveness in the Cape Cod Land Acquisition Office, resulting in a most efficient operation with minimal personnel problems. Her adeptness in setting up office procedures with regard to acceptance of Offers to Sell Real Property and payment of the vouchers has been a major contributing factor in the timely processing of a large number of acquisition and closing cases. She received this award in recognition of her superior achievements as secretary in the Land Acquisition program.

Gordon Warren

The Superior Service Award has been given to Gordon P. Warren upon his retirement after a dedicated career as plumber in the National Park Service.

During his nine years as maintenance man and plumber with Cape Cod Seashore, Mr. Warren was given the responsibility of operating and maintaining numerous NPS water and sewer systems. This involved operating pumps, chlorinators and sewerage disposal systems. He also made repairs to water and sewer lines and plumbing fixtures, and performed overall maintenance to numerous pumping stations.

Mr. Warren was always reliable and carried out his work in a highly satisfactory manner. He willingly aided his coworkers in their work, and made sure deadlines were always met and his excellent performance has been recognized by this Superior Service Award.

Silhoutte

Eunice Carroll

by Jean R. Swearingen

This is Eunice Berg Carroll, born a bunch of years ago in someplace called Dayton, Iowa. . .our remarkable Regional Budget Officer here in Santa Fe. We couldn't do without her, but sometimes, when she gets impy, we're not sure what do **with** her.

She is trustworthy, loyal, helpful, courteous, kind, obedient (depnding on who you talk to), cheerful, thrifty, brave, clean and reverent, BUT, fortunately for us, she is no Boy Scout. (We are pretty sure her great husband, Scottie, will attest to that!)

When budgetary strains press hard on her during end-of-the-year type rushes, and other sorts of WASO type pressures, she gets as up-tight and tense as regular people; but somehow she does not ever take it out on others as some folk are apt to do. Her disposition seldom strays from her good-natured self.

She is understanding to those of us who don't really understand budgeting — has infinite patience and wisdom, figuring solutions to problems for us here in Region III and for superintendents in the hinterlands, helping when possible (most usually), but never hindering.

Back in 1935, she began her NPS career as some sort of under-clerk in the regional office in Oklahoma City. She moved here in 1937 when the Region III office was set up in Santa Fe, and clerk stenoed and accounted until resigning in 1943.

She returned to the fold in 1950 in Budget, snitching the position of budget officer in 1955 where she has remained to the present, growing with this ever-increasingly important job.

It is not what it was in the old days! January 25th, 1972 she will have stuck it out for 30 years in the NPS. And all this on a high school education! There have only been two female Budget Officers and one is retired, so that leaves Eunice, one-of-a kind in more ways than one.

Those fortunate enough to have known her and Scottie are fortunate indeed. Those who haven't met them, should!

Sunset Crater VIP Honored

Superintendent Clarence Gorman and Park Ranger Don Magee of Wupatki and Sunset Crater National Monuments recently awarded a "Certificate of Appreciation" to Robert M. Huncilman of Flagstaff, Arizona in recognition of his contribution to the National Park Service as a VIP at Sunset Crater.

Bob first learned of the VIP program from an article in the local Flagstaff newspaper in March, 1971. Two days later he began duty at the national monument as an Interpretive Assistant and has now accumulated a total of more than 1,200 hours of volunteer service.

Jarvis Cited For Oil Clean Up

Olympic National Park Superintendent Roger W. Allin has presented a Departmental Unit Citation for Excellence of Service to Assistant Superintendent Reed W. Jarvis.

This citation for outstanding service recognizes Mr. Jarvis's participation with other Western Region office personnel in supervising and coordinating over 2,100 volunteers in the clean up of an oil spill.

On January 18, 1971, approximately 880,000 gallons of fuel oil was dumped into San Francisco Bay and the Pacific Ocean when two oil tankers collided near the Golden Gate Bridge. Tidal action, wind and ocean currents spread much of the oil onto five miles of beach within the Point Reyes National Seashore.

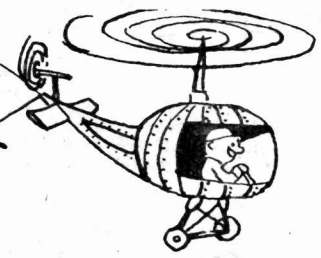

Much time and effort was needed to coordinate the many varied agencies, companies, and groups who took part in locating, purchasing and using material and supplies to retrieve the oil and to provide for the basic needs of the individuals concerned with the clean-up.

Throughout the nine-day period, Service personnel, of which Mr. Jarvis was a part, undertook the coordination and operational tasks from dawn to dusk. They worked diligently and with dedication toward removing the oil, rescuing oil-soaked birds, and supervising and coordinating the volunteers.

Midwest director J. Leonard Volz presents a posthumous Meritorious Service Award on behalf of Robert W. Jackson, former Chief of Lands in the Midwest Office in Omaha, to his widow, Mrs. Harriette S. Jackson.
