## TRAVEL TIPS

- Maps show each park's prominent features and main roads, trails, and visitor services. Services are limited.
- **Drinking water** is available at all parks.
- **Food, gasoline, stores, and lodging** are not available within either park. Full services are found in Moab, Green River, Monticello, Hanksville, and other nearby towns.
- **The Needles Outpost**, a commercial facility 1.5 miles from Needles Visitor Center, offers gasoline, food, and limited supplies (the hours of operation change frequently).
- Stop at the visitor center to check on the park road and trail conditions; weather can make an area impassable. Detailed maps and guides of the 4-wheel-drive routes and hiking trails are available. For longer trips topographic maps sold at the park visitor centers are essential.
- Unpaved 2-wheel-drive roads can be negotiated by a regular passenger vehicle.
- Roads for 4-wheel-drive vehicles are too steep, rocky, rough, sandy, or hazardous for 2-wheel-drive vehicles.
- High-clearance 2-wheel-drive vehicles can travel some of these roads under good conditions.
- Ask a ranger for more information about park road conditions.
- **Bicycles and all motor vehicles must stay on roads.**

**Canyonlands Natural History Association (CNHA)** is a nonprofit organization established to assist the scientific and educational efforts of the National Park Services (NPS), Bureau of Land Management (BLM), and the USDA Forest Service by providing quality educational materials to those who visit our public lands.
