BATS

OF CARLSBAD CAVERNS

NATIONAL PARK

BATS OF CARLSBAD CAVERNS NATIONAL PARK

Because bats are active at night and roost in secretive places during the day, they are often feared and misunderstood, especially in North America. This nontechnical, 32-page book is about bats that inhabit Carlsbad Caverns National Park, New Mexico. The text incorporates the latest research on the 15 resident species, dispels common misconceptions about bats, and emphasizes their ecological, economic, and scientific importance. More than 30 full-color, close-up photographs reveal the intriguing lives of these bats as they hunt for insects, nurse their young, drink from waterholes, hibernate in caves, roost in foliage, and echolocate in flight.

BATS OF CARLSBAD CAVERNS NATIONAL PARK will be of interest to anyone wanting to learn more about bats, and it will be especially meaningful to park visitors who have watched the evening flight of hundreds of thousands of Mexican free-tailed bats from Carlsbad Cavern.

**Available at the park's visitor center or by mail:
please see reverse for order information.**

Carlsbad Caverns Natural History Association is a non-profit organization cooperating with the National Park Service providing visitors with interpretive literature. Proceeds from the sale of publications are used to support the educational and visitor services programs of Carlsbad Caverns & Guadalupe Mountains National Parks. Membership information and a complete list of publications is available from:
