

Cultural Resource Preservation Brief #1

A series of Natural Resource Preservation Briefs were initiated several months ago to provide the park staff with information concerning preservation projects that are underway. It is now apparent that a similar series of briefs dealing with cultural resources management projects would be worthwhile.

As with the Natural Resource Preservation Briefs, this new series will be developed to help the staff respond to visitor and phone questions.

Please advise the Resources Management Staff of any suggestions you may have on topics.

The Resources Management Staff
