

Guadalupe Mountains National Park

Peregrine Falcon

McKittrick Pennyroyal

***Help Protect Our
Unique and
Fragile
Natural Heritage***

More and more of the world's rich natural heritage is being destroyed and lost each year.

Every hour 2-3 species become extinct; 48-72 species a day. By the end of the century it is estimated that one million species of plants and animals will have been lost, lost forever.

Your help is needed to preserve our rich natural heritage. Observe and obey the rules set for protection of the park's resources. Become involved as a volunteer and actively support protection work.

Remember, we have not inherited the land from our fathers. We have borrowed it from our children.
