Description:

Subsequent to World War Two and the Korean War, the National Park Service found itself greatly in need of new construction due the decay incurred during the war years and the ever-increasing number of tourists. The Service lacked a systematic method and enough on-site rangers to communicate the message of the importance of preserving America's natural and cultural treasures. In 1955, the Director of the Park Service, Conrad Wirth, envisioned a plan to improve conditions at the Parks by developing modern conveniences and implementing a system-wide method of educating the visiting public. This new plan, called "Mission 66", introduced the concept of the "Visitor's Center", now a common sight in all National Parks and Monuments. Park planners, architects and landscape architects devised the concept to incorporate visitor facilities, interpretative programs and administrative offices in one structure. In contrast to the rustic style buildings constructed during the Civilian Conservation Corps, these new buildings embraced contemporary structural form. Contrasting with the reserved character of the CCC style, these Mission 66 buildings conveyed a bold commercial appearance that enticed and attracted visitors. Modern materials and designs characterized the new architecture, with open interior spaces and expansive areas to provide views of nearby natural and cultural resources. Instantly recognizable, these buildings advertised public service, orientation information and other amenities. This program represented the largest undertaking ever initiated by the National Park Service. By the end of the billion dollar program in 1966, the parks and the public enjoyed a wealth of modern services, including 584 new comfort stations, 220 administrative buildings, 36 service buildings, over 1,300 housing units and more than 100 new visitors centers. Additionally, the National Park Service acquired 78 new parks and monuments. This forward-looking program achieved the infrastructure and staffing so that the broadest number of visitors could enjoy America's natural and cultural treasures, while simultaneously providing the greatest amount of protection to preserve these treasures.

No copyrighted material is contained in this collection.

Acquisition:

Found in collection at WACC.

Processing:

This collection was processed and cataloged at the Intermountain Region Museum Services Center by K Saba on July 22, 2005.

Arrangement:

This collection is arranged at the series level; each monument is represented by a series. There are a total of twenty-two series in this collection.

Extent:

This collection totals 1.0 LF.

COPYRIGHT AND RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials. The various state privacy acts govern the use of materials that document private individuals, groups, and corporations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a reproduction if the document does not infringe the privacy rights of an individual, group, or corporation. These specified conditions of authorized use include:

- non-commercial and non-profit study, scholarship, or research, or teaching
- criticism, commentary, or news reporting
- as a NPS preservation or security copy
- as a research copy for deposit in another institution

If a user later uses a copy or reproduction for purposes in excess of "fair use," the user may be personally liable for copyright, privacy, or publicity infringement. This institution's permission to obtain a photographic, xerographic, digital, or other copy of a document doesn't indicate permission to publish, exhibit, perform, reproduce, sell, distribute, or prepare derivative works from this document without first obtaining permission from the copyright holder and from any private individual, group, or corporation shown or otherwise recorded.

Permission to publish, exhibit, perform, reproduce, prepare derivative works from, sell, or otherwise distribute the item must be obtained by the user separately in writing from the holder of the original copyright (or if the creator is dead from his/her heirs) as well as from any individual(s), groups, or corporations whose name, image, recorded words, or private information (e.g., employment information) may be reproduced in the source material. The holder of the original copyright isn't necessarily the National Park Service. The National Park Service is not legally liable for copyright, privacy, or publicity infringement when materials are wrongfully used after being provided to researchers for "fair use."

This institution reserves the right to refuse to accept a copying order if fulfillment of the order is judged in violation of copyright or federal or state privacy or publicity law.

SCOPE AND CONTENT

Collection: WACC 1480

Collection Title: SWAC MISSION 66 COLLECTION

Catalog No WACC 21215

Accession No WACC-01480

Inclusive Dates 1956 - 1958

History

Subsequent to World War Two and the Korean War, the National Park Service found itself greatly in need of new construction due the decay incurred during the war years and the ever-increasing number of tourists. The Service lacked a systematic method and enough on-site rangers to communicate the message of the importance of preserving America's natural and cultural treasures. In 1955, the Director of the Park Service, Conrad Wirth, envisioned a plan to improve conditions at the Parks by developing modern conveniences and implementing a system-wide method of educating the visiting public. This new plan, called "Mission 66", introduced the concept of the "Visitor's Center", now a common sight in all National Parks and Monuments. Park planners, architects and landscape architects devised the concept to incorporate visitor facilities, interpretative programs and administrative offices in one structure. In contrast to the rustic style buildings constructed during the Civilian Conservation Corps, these new buildings embraced contemporary structural form. Contrasting with the reserved character of the CCC style, these Mission 66 buildings conveyed a bold commercial appearance that enticed and attracted visitors. Modern materials and designs characterized the new architecture, with open interior spaces and expansive areas to provide views of nearby natural and cultural resources. Instantly recognizable, these buildings advertised public service, orientation information and other amenities. This program represented the largest undertaking ever initiated by the National Park Service. By the end of the billion dollar program in 1966, the parks and the public enjoyed a wealth of modern services, including 584 new comfort stations, 220 administrative buildings, 36 service buildings, over 1,300 housing units and more than 100 new visitors centers. Additionally, the National Park Service acquired 78 new parks and monuments. This forward-looking program achieved the infrastructure and staffing so that the broadest number of visitors could enjoy America's natural and cultural treasures, while simultaneously providing the greatest amount of protection to preserve these treasures.

This collection contains twenty-two bound reports, organized by monument in alphabetical order. These reports were generated by the Southwest Archeological Center, formally located in Globe, Arizona, for the Region III Monuments. Each report contains correspondence and a prospectus for the needs of each individual park. Comments by the Regional Director Mugh Miller, General Superintendent John Davis, and Director Conrad Wirth are also included.

Arrangement

This collection is arranged at the series level; each monument is represented by a series. There are a total of twenty-two series in this collection.
