National Park Service
CENTENNIAL

MONTEZUMA CASTLE NATIONAL MONUMENT

YEAR IDENTIFIED

1906

SIZE OF PARK

826 Acres

AVERAGE VISITS PER YEAR

350,000

FUN FACTS #1-a

Some of the original roofs at the Montezuma Castle cliff dwelling are made of Ponderosa pine and Douglas fir, species that generally grow at much higher elevations (6,000 ft AMSL). This suggests that at least some of the wood used to build the dwelling was carried from far away locations.
