#### **Birds at Star Fort Pond**

## A guide to help you identify some of the avian species you may encounter at Star Fort Pond

Birding is a great activity for beginning and experienced naturalists alike. Viewing some of Ninety Six National Historic Site's one hundred and thirty-seven species of birds can be fun, relaxing, and educational. The Star Fort Pond is a prime birding site as it provides a wide variety of habitats. This brochure highlights some species you are unlikely to see in other areas of the park, but is certainly not a complete list of birds you may see at Star Fort Pond. There is always something new to discover and you could be the first to view a species here so bring your binoculars!
