

# The National Park Service

January 1999

*Natural Resource Information Division  
Fact Sheet Series*

## Product Announcement

January 1999

---

The Natural Resource Information Division provides periodic announcements of new and available NPS products that are useful for the preservation and management of natural resources. Such products may be reports, books, tapes, CD-ROMs, posters, or posted information on the Internet. The products are listed by originating facility from which they may be requested. The product announcements are expected to further the dissemination of important information to NPS unit staff, to their associates, and to their visitors.

NRID expects to create a database for the Intranet that may be accessed by NPS staff for adding material. In the meantime, all NPS units and programs, divisions, regions, support offices, and individuals are invited to provide the Chief of NRID with lists of their recent products for inclusion in the announcements by fact sheets. A periodic reminder will be issued. As usual, the fact sheets will be posted on the Natural Resource and INTOUCH bulletin boards and on the Intranet.

Comments and suggestions for the improvement of the announcements may be sent to Chief, NRID, 1201 Oak Ridge Drive, Suite 350, Fort Collins, CO 80525 or sent by cc:Mail to Gregory, Rich.

---

***PLEASE REQUEST PRODUCTS FROM  
THE LISTED ORIGINATING FACILITY.  
NRID DOES NOT MAINTAIN COPIES OF  
THE PRODUCTS!***

- Selleck, J., editor. Park Science back issues available on CD-ROM: A two-CD-ROM set containing 67 back issues of the resource management bulletin Park Science is now available in limited numbers from editor Jeff Selleck ([jeff\\_selleck@nps.gov](mailto:jeff_selleck@nps.gov)). Covering the period from 1980 (volume 1, number 1) through 1998 (volume 18, number 1), the CDs provide an efficient way for readers to search the contents. Every word is indexed, which provides quick access to 1,896 pages of articles. The main menu also lists the issues chronologically and provides another way to access content. Articles can be displayed on the computer monitor and printed. The issues are in portable document format (PDF), which preserves their original appearance. Software to run the application (Adobe Acrobat Reader) is supplied on the disks and can be installed on computer or run from a CD drive. Two issues of the Natural Resource Year in Review and article submission guidelines for Park Science are also on the disks. The application is fully integrated and will run on a variety of Windows, Macintosh, and UNIX operating systems
