

NATURAL RESOURCE PRESERVATION BRIEF #1

As a follow-up to a memorandum I sent around to all Division Chiefs several months back on information net-working, I am intending to start writing a series titled, "Natural Resource Preservation Briefs."

The series will be prepared irregularly and will provide the park staff with information on the Natural Resources Management Programs here at Antietam. I hope you will find the information useful in dealing with visitor questions and phone calls. Who knows, you may even learn something about Resources Management.

At this point I anticipate writing briefs on:

- Woodchuck Management
- Bluebird Management
- Agricultural Special Use
- Wildfire Management
- Hazardous Plants and Animals

If you think of other topics, please let me know.

The interpretive staff may find these useful for distribution to the public.
